SUMMARY

Seasoned Senior Frontend Engineer with 8+ years of experience building high-impact, user-centric web applications across large-scale, performance-critical environments. Proven expertise in architecting modern frontend systems using React, Next.js, TypeScript, Vue, and NodeJS, with a strong focus on scalability, accessibility, and clean design systems. Adept at leading frontend architecture, implementing robust CI/CD pipelines, and driving engineering excellence through component standardization, performance optimization, and automated testing (Jest, Cypress, Playwright).

CORE COMPETENCIES

. **: Frontend Architecture:** Scalable component systems, micro-frontends, monorepos, design systems, and SSR/SSG/ISR strategies.
Programming Languages: TypeScript, modern JavaScript (ESNext), NodeJS, Python, and PHP.
Frameworks & Tools: React, Next.js, Vue.js, Tailwind, Redux, Storybook, and Webpack/Vite/Rollup for custom build pipelines.
System Design & UX Engineering: Design systems, accessibility (WCAG), cross-platform consistency, and Figma-to-code workflows.
Performance Engineering: Rendering optimization, code splitting, CDN strategies, RUM metrics, and Core Web Vitals.

. **: Quality & Reliability:** Automated and visual testing, CI-driven QA, and release strategies like feature flags and canary deploys.
Cloud & Infra for Frontend: AWS CloudFront/S3, Vercel, Dockerized frontends, edge rendering, and CI/CD automation.
API & Integration Expertise: GraphQL, REST, real-time APIs, modern auth flows, and client-side security best practices.
Observability & Monitoring: Sentry, Datadog RUM, LogRocket, synthetic monitoring, and deep frontend profiling.
Leadership & Methodologies: Technical direction, architecture reviews, DevOps culture, Agile, TDD/BDD, and mentorship.

WORK EXPERIENCE

Roche Genentech San Francisco, CA (Remote)

Frontend Software Engineer (ReactJS) *May 2023 - Present*

- **Led** frontend architecture for a clinical trial data platform, designing a reusable **design system** in **ReactJS** and **Radix UI** that improved consistency, accessibility, and developer efficiency across products.
- Transformed a **legacy** Vue.js web app into a **ReactJS Chrome extension,** optimizing workflows for clinical site integrations and enhancing adoption by collaborating closely with design and backend teams.
- **Optimized** application performance in a **ReactJS** and **TypeScript**-based **SPA** by implementing lazy loading, code splitting, dynamic imports, and image optimization, reducing load times greatly. Enhanced responsiveness with **Radix UI layouts, memoization**, and efficient **CDN asset delivery,** using **Lighthouse** and **Chrome DevTools** to identify and resolve bottlenecks.
- Enhanced application security and user experience by developing **JWT**-based authentication and role-based access control in a **Next.js** frontend with **TypeScript** and **React Query**, using **HTTP-only** cookies for token handling and collaborating with backend teams to enforce permission-based UI rendering.
- **Scaled** state management in a large **NextJS** application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow, **cutting redundant re-renders**, and accelerating developer onboarding through consistent, maintainable patterns.
- Increased stakeholder confidence and release reliability by integrating **Playwright end-to-end tests** into the **CI/CD** pipeline. **Automated** test reporting with **Allure Reports** hosted on **GitHub Pages** and configured **Slack** notifications to share result links on every push, providing real-time visibility into build quality and test outcomes.

DESCASIO LTD **Lagos, Nigeria**

Staff Frontend Engineer *May 2021 - Apr 2022*

- **Owned** the core f**rontend architecture** for a data-heavy **React dashboard**, implementing virtualization and efficient state management to handle large datasets seamlessly.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by 30% - 40% through **rollup-plugin-visualizer** and **webpack-bundle-analyzer**, which led to a 35% faster load time and smoother runtime experience across devices

- **Established** engineering standards for **code quality**, **testing**, and **deployment** across the team using **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**, reducing errors and accelerating **CI/CD processes**.
- **Mentored** junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent design across projects

EDUCATION

University of Nigeria **Nsukka, Enugu**

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
