SUMMARY

Senior Frontend Developer with 8+ years of experience building complex, high-performance web applications using React, TypeScript, and Redux in large-scale, data-intensive environments. Proven track record of solving non-trivial UI challenges, including real-time dashboard rendering with large datasets, performance optimization at both component and architectural levels, and modernizing legacy systems into extensible React architectures. Passionate about shaping product direction, collaborating closely with UI/UX designers, and driving frontend architecture decisions that scale.

CORE COMPETENCIES

- **Frontend Development:** React 18/19, TypeScript, HTML5, CSS3, modern JavaScript (ESNext), browser and DOM APIs.
- **State Management & Data:** Redux (Toolkit, RTK Query), React Query, GraphQL, REST APIs, and real-time data synchronization.
- **Performance Engineering:** Component-level and architectural optimization, code splitting, lazy loading, memoization, virtualization, bundle analysis, and Core Web Vitals.
- **Testing & Quality:** Jest, Playwright, Cypress, visual regression testing, CI-driven QA, TDD/BDD, and comprehensive test strategies.
- **Frontend Architecture:** Extensible component systems, plugin-based architectures, design systems, monorepos, and legacy modernization.
- **Build Tooling & CI/CD:** Webpack, Vite, Rollup, GitHub Actions, automated test pipelines, and release strategies (feature flags, canary deploys).
- **Design Collaboration:** Figma-to-code workflows, design system implementation, accessibility (WCAG), and close partnership with UI/UX designers.
- **Leadership & Collaboration:** Architecture reviews, mentorship, Agile/Scrum, cross-functional collaboration, and open feedback culture.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Architected an **extensible design system** in **React** and **Radix UI** with **TypeScript**, building a scalable, reusable component library that improved UI consistency, accessibility, and developer velocity across multiple product teams.
- Delivered **performance optimizations** in a **React** and **TypeScript** SPA by implementing **lazy loading, code splitting, memoization**, and efficient CDN asset delivery, significantly reducing load times. Used **React Profiler**, Lighthouse, and Chrome DevTools to identify and resolve rendering bottlenecks at both component and architectural levels.
- Scaled **state management** in a large application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow, eliminating redundant re-renders, and establishing maintainable patterns that accelerated developer onboarding.
- Modernized a **legacy Vue.js** web application into a **React Chrome extension**, redesigning the frontend architecture to improve extensibility, maintainability, and adoption across clinical site integrations while collaborating closely with **design and backend teams**.
- Engineered **JWT-based authentication** and **role-based access control** in a Next.js frontend with **TypeScript**, implementing HTTP-only cookies for secure token handling and collaborating with backend teams to enforce permission-based UI rendering.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating test reporting with Allure Reports and configuring real-time Slack notifications, providing continuous visibility into build quality on every push.

DESCASIO LTD — Lagos, Nigeria
Staff Frontend Engineer — *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a data-heavy **React dashboard** serving large datasets, implementing **virtualization** and efficient **state management** with Redux to maintain smooth, responsive UI performance under heavy data loads.
- Optimized frontend performance by identifying render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by **30%-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time** and smoother runtime experience across devices.
- Established engineering standards for **code quality, testing**, and deployment across the team using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers and guided **frontend best practices**, fostering a culture of high-quality, maintainable code, open collaboration, and consistent design across projects.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
