SUMMARY

Frontend Developer with 8 years of professional experience working with HTML, CSS, and structured data formats across healthcare, fintech, and enterprise environments. Skilled in managing and processing content using HTML, JSON, and CSV-based workflows, with a meticulous, detail-oriented approach to data accuracy and consistency. Proven ability to collaborate effectively within cross-functional teams, maintain high-quality standards across content systems, and quickly adapt to new tools and processes.

CORE COMPETENCIES

- **Web Technologies:** HTML, CSS, JavaScript (ESNext), TypeScript, responsive layouts, and cross-browser compatibility.
- **Structured Data:** JSON, CSV, REST APIs, data validation, and content processing workflows.
- **Content Management:** Component documentation (Storybook), content accuracy auditing, and systematic data handling across multiple systems.
- **Quality & Accuracy:** Detail-oriented development, automated testing (Jest, Playwright), code review, and data consistency verification.
- **Collaboration & Communication:** Agile/Scrum workflows, cross-functional team collaboration, mentorship, and comprehensive documentation.
- **Tools & Infrastructure:** Git, GitHub Actions, CI/CD pipelines, Docker, VS Code, and Chrome DevTools.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, managing structured content configurations across clinical site integrations.
- Maintained and extended the existing **Vue.js** codebase during the migration period, ensuring **data accuracy** and consistency across both platforms while fixing bugs and shipping features in parallel.
- Architected a reusable design system in **React** with **HTML/CSS** (Tailwind CSS), improving UI consistency and accessibility (**WCAG**) across multiple product teams.
- Co-developed a full-stack **Next.js** chat widget processing **JSON**-structured API responses from an OpenAI-powered RAG system, enabling users to query data in real time via a conversational interface.
- Optimized application performance by implementing lazy loading, code splitting, and CDN asset delivery, measuring improvements via **Lighthouse** and **Chrome DevTools**.
- Increased release reliability by integrating **Playwright** end-to-end tests into the CI/CD pipeline, automating test reporting with Allure Reports and configuring Slack notifications for build quality visibility.
- Authored comprehensive technical documentation for component APIs and configuration workflows, ensuring clear communication of development processes across teams.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and attention to detail.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface using **HTML/CSS** and TypeScript, achieving a **25% boost in user engagement** and collaborating with architects to create a scalable frontend architecture that accelerated development by **30%**.
- Utilized **Storybook** for documenting React components with structured **HTML/CSS** examples, streamlining change management and ensuring clear communication of development processes across the team.
- Optimized frontend performance by profiling render bottlenecks with React Profiler and **Lighthouse**, reducing bundle size by **30-40%** through systematic analysis with rollup-plugin-visualizer and webpack-bundle-analyzer.
- Enhanced development workflow by introducing **Jest** and Enzyme testing frameworks, leading to a **20% decrease** in bug reports through rigorous quality assurance.
- Established engineering standards for code quality using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Supported agile project management practices, aiding in the precise gathering of user requirements and effectively planning user stories, estimates, and work plans.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria

Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank **Settlement Solution** in a team of 3, processing structured transaction data (including **CSV** and **JSON** formats) for thousands to millions of daily transactions, boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React**, Redux, RxJS, and Axios, handling complex **JSON** API request/response structures.
- Built a real-time account reconciliation solution, processing structured financial data and boosting daily reconciliation accuracy by **60%** through innovative data management strategies.
- Built dynamic data visualization dashboards using **React** and react-chartjs, transforming **JSON** data feeds into actionable visual reports with Redux Toolkit and Ant Design.

Founders Lair Beijing, China (Remote)

Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS RESTful APIs** handling **JSON** request/response payloads, translating business requirements into efficient **MongoDB** database models and schemas.
- Transformed Figma designs into reusable **React** components with semantic **HTML** and **CSS**, and engineered a CI/CD pipeline for automated deployment to Heroku and AWS.
- Mentored two interns through frontend and backend projects, providing technical guidance, task management, and documentation practices.

SureTrade Business Solutions Nigeria

Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints that processed **JSON** data for multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5 using **HTML**, **CSS**, and **JavaScript**, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **HTML/JavaScript** frontend to NodeJS backend services, developing user use cases, and converting business requirements into database schemas.
- Devised comprehensive documentation for each application, detailing all functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure data reliability and accuracy.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
