PROFESSIONAL EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a Vue.js web application to a React Chrome extension, optimizing workflows for clinical site integrations and enhancing user adoption across distributed teams.
- Architected a reusable design system in React and Radix UI with Tailwind CSS, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Optimized application performance by implementing lazy loading, code splitting, dynamic imports, and CDN asset delivery, reducing load times significantly as measured via Lighthouse and Chrome DevTools.
- Introduced Redux for state management and React Query for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Implemented JWT-based authentication and role-based access control in Next.js with TypeScript and React Query, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Increased release reliability by integrating Playwright end-to-end tests into the CI/CD pipeline, automating reporting with Allure Reports on GitHub Pages and configuring Slack notifications for build quality visibility.
- Co-developed a full-stack Next.js chat widget powered by a RAG system using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma vector database, enabling users to query their data in real time via a conversational interface.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and code quality through structured code reviews and pair programming.
