SUMMARY

Senior Frontend Engineer with 8 years of professional experience building pixel-perfect, accessible, and high-performance web applications at healthcare enterprise companies and product startups. Expert in React, TypeScript, and Tailwind CSS with a strong track record of translating Figma designs into polished, production-ready UI components, integrating backend APIs, and owning features end-to-end from implementation through deployment. Experienced incorporating AI tools into development workflows and comfortable operating autonomously in fast-moving, high-ownership engineering teams.

CORE COMPETENCIES

- **Frontend Engineering:** React, TypeScript, Next.js, Tailwind CSS, Radix UI component primitives, design systems, and SSR/SSG.
- **UI Implementation:** Figma-to-code workflows, pixel-perfect component delivery, accessible UI (WCAG/ARIA), and cross-browser compatibility.
- **State Management & Data Flow:** Redux, Redux Toolkit, React Query, Zustand, Axios, and REST/GraphQL API integration.
- **Performance Optimization:** Code splitting, lazy loading, CDN delivery, bundle analysis, Core Web Vitals, Lighthouse, and React Profiler.
- **Testing & Quality:** Playwright, Jest, Enzyme, Allure Reports, Storybook, ESLint, Prettier, Husky, and CI-driven QA with GitHub Actions.
- **AI Tools & LLM Integration:** OpenAI API, LangChain, Vercel AI SDK, RAG pipelines, Mastra multi-agent systems, and AI-assisted prototyping.
- **Cloud & DevOps:** GitHub Actions CI/CD, Docker, AWS, Vercel, and end-to-end feature deployment pipelines.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer (React / TypeScript) *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, translating complex product requirements into a new **React Chrome extension** migrated from a legacy **Vue.js** web application, delivering a pixel-perfect, accessible UI that improved workflow adoption for clinical site integrations.
- Architected a reusable **design system** in **React**, **Radix UI**, and **Tailwind CSS**, establishing consistent component primitives with full **WCAG accessibility** compliance and improving UI coherence and developer velocity across 2 product teams.
- Implemented **JWT-based authentication** and **role-based access control** on the frontend using **TypeScript** and **React Query**, integrating login, signup, and protected client-side routes with HTTP-only cookie token handling and seamless backend API alignment.
- Introduced **Redux** for global state management and **React Query** for API caching and request deduplication, refactoring class-based React components to modern functional components and clarifying data flow across the application.
- Optimized application performance via **lazy loading, code splitting, dynamic imports**, and **CDN asset delivery**, identifying and resolving bottlenecks with **Lighthouse** and **Chrome DevTools** to achieve measurable load time improvements across all devices.
- Co-developed a full-stack **Next.js** chat widget powered by a **RAG system** using **OpenAI GPT models**, **LangChain**, and **Vercel AI SDK**, enabling users to connect data sources and query them in real time via a conversational interface embedded on external sites.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **GitHub Actions CI/CD pipeline**, automating test reporting with **Allure Reports** on GitHub Pages and triggering Slack notifications on every push to surface build failures instantly.
- Mentored two junior developers (interns), conducting regular code reviews and providing hands-on guidance in frontend architecture, React patterns, and engineering best practices.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of a **React/TypeScript** user interface with a scalable component architecture, achieving a **25% boost in user engagement** and accelerating frontend development velocity by **30%** through close collaboration with software architects on system and API design.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, reduced bundle size by **30-40%** using rollup-plugin-visualizer and webpack-bundle-analyzer, and achieved a **35% faster load time** across devices through targeted code splitting and optimized asset delivery.

- Drove a **40% improvement** in application performance by overhauling caching strategies across the React application, significantly boosting speed and user experience across all product flows.
- Introduced **Jest** and **Enzyme** automated testing frameworks, reducing bug reports by **20%**, and used **Storybook** for component documentation to streamline change management and ensure consistent component behavior across the team.
- Established engineering-wide standards for code quality and deployment using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing integration errors and accelerating CI/CD processes across the team.
- Mentored junior engineers on **React** best practices, fostering a culture of high-quality, maintainable code and consistent design implementation across all projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank **Settlement Solution** in a team of 3 frontend engineers, handling millions of daily transactions and boosting settlement rates by **80%** through efficient **React** and **Redux** state management paired with **RxJS** for real-time data streaming.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce), integrating backend APIs via **Axios** and managing complex real-time data flow from server to UI across all transaction types.
- Built a real-time account reconciliation solution, improving daily reconciliation efficiency by **60%** by adopting the native browser **EventSource API** for live data streaming, replacing socket.io for faster, more responsive updates.
- Developed dynamic data visualization dashboards using **React** and **react-chartjs**, managing user roles and permissions with **Redux Toolkit** and **Ant Design** UI components.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Transformed Figma design specifications into reusable **React** components, delivering pixel-accurate, intuitive user interfaces that matched design intent precisely across all product screens.
- Developed **NodeJS RESTful APIs** to power new product features, integrating backend data flows directly into the React frontend and maintaining clean separation of concerns throughout.
- Engineered a **CI/CD pipeline** for automated deployment to testing environments on **Heroku** and production servers on **AWS**, owning the full deployment workflow end-to-end.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed **SureEdu**, a school management portal in a team of 5, building the **JavaScript/HTML/CSS** frontend and integrating it with **NodeJS** backend services for staff payroll, student records, attendance tracking, and guardian communications.
- Implemented and tested 15+ **REST API** endpoints in **NodeJS**, designing **MongoDB** schemas and models from user use cases and business requirements.
- Authored comprehensive documentation for each application covering all functions, capabilities, and features, and tested user-defined functions and API endpoints to ensure reliability across multiple client-facing products.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Built the citizen-facing frontend in **Next.js** with **React 19**, **Tailwind CSS v4**, and **Recharts**, delivering 22 interactive chart types auto-generated from AI responses, dark mode, URL state management with nuqs, and a fully responsive mobile layout, owned end-to-end from design through production deployment.
- Architected the entire platform as an **Nx monorepo** managing 6 applications (NestJS API, Next.js web app, admin dashboard, marketing landing page, document ingestion pipeline, and Remotion video service), using AI tools including **OpenAI API** and the **Mastra** multi-agent framework throughout feature development and prototyping.
- Implemented **SSE streaming** for real-time chat responses with 15s keepalive heartbeats, shareable public conversations with full **SEO optimization** (Open Graph, JSON-LD, SSR slug-based URLs), and Telegram OAuth with phone OTP authentication, showcasing end-to-end feature ownership across the full product stack.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
