SUMMARY

Senior Frontend Engineer with 8 years of professional experience building scalable, production-grade web applications, with a strong background in fintech and B2B payment solutions. Proven expertise in architecting modern frontend systems using React, TypeScript, and React Query, alongside building robust component libraries and design systems. Adept at driving engineering excellence through comprehensive UI and end-to-end testing (Playwright, Jest), performance optimization, and integrating observability tools. Demonstrated ability to own complex, workflow-driven features end-to-end while collaborating with cross-functional teams in remote environments.

CORE COMPETENCIES

- **Frontend Architecture:** Scalable component systems, design systems, monorepos, and workflow-driven UIs.
- **Frameworks & Languages:** React, TypeScript, JavaScript (ESNext), HTML5, and CSS3.
- **State Management & Data:** React Query, Redux, REST API integration, and JWT authentication.
- **Testing & Quality:** Playwright (E2E), Jest, Enzyme, Storybook, and clean code practices.
- **Cloud & Infrastructure:** AWS, Docker, GitHub Actions, and CI/CD pipelines.
- **Performance & Observability:** Sentry, Datadog RUM, Lighthouse, Core Web Vitals, and bundle analysis.
- **Backend Knowledge:** NodeJS, NestJS, PostgreSQL, and RESTful API design.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of a workflow-driven clinical trial data product, migrating from a Vue.js web application to a **React Chrome extension**, optimizing complex data transfer processes.
- Architected a scalable, reusable **design system** in **React** and **Radix UI**, improving UI consistency, accessibility, and developer velocity across multiple cross-functional teams.
- Introduced **React Query** for modern data-fetching and request caching, alongside **Redux** for state management, refactoring legacy code to clean, maintainable functional components.
- Implemented **JWT-based authentication** and **role-based access control (RBAC)** in the UI, securely handling tokens and enforcing permission-based rendering for sensitive workflows.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** to maintain high code quality standards.
- Optimized application performance by implementing **lazy loading, code splitting**, and **CDN asset delivery**, significantly reducing load times as measured via **Lighthouse** and Chrome DevTools.
- Co-developed a full-stack chat widget powered by a RAG system using OpenAI models, enabling users to query complex data sources in real time.
- Mentored a team of two junior developers, fostering a culture of technical excellence, clean abstractions, and robust testing practices.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with product managers and designers to create a scalable frontend architecture.
- Enhanced the development workflow by introducing **Jest** and **Enzyme** for UI unit testing, which led to a **20% decrease** in bug reports and improved overall code quality.
- Optimized frontend performance by identifying render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** and achieving a **35% faster load time**.
- Utilized **Storybook** for documenting React component libraries, streamlining change management and ensuring clear communication of UI patterns across the engineering team.
- Established engineering standards for code quality and deployment using **ESLint, Prettier, Husky**, and **GitHub Actions**, accelerating CI/CD processes.
- Drove a **40% improvement** in React application performance by optimizing caching mechanisms and data-fetching patterns.
- Mentored junior engineers and guided frontend best practices, ensuring consistent design and maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3, significantly enhancing transaction processing capabilities to handle millions of daily transactions and boosting settlement rates by **80%**.
- Spearheaded the development of critical payment modules (MasterCard, VISA, E-commerce) using **React, Redux**, and **Axios** for robust **REST API integration**.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by **60%** through innovative data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, ensuring fast data updates and a highly responsive interface for complex financial workflows.

SureTrade Business Solutions Nigeria

Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Developed **SureEdu**, a comprehensive management portal in a team of 5, handling staff payroll, attendance tracking, and user communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, and converting business requirements into robust technical solutions.

PROJECTS

OurNigeria ournigeria.ng

Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected an AI-powered data analysis platform as an **Nx monorepo**, managing a **Next.js** citizen-facing web app, an admin dashboard, and a **NestJS** backend API.
- Configured **CI/CD** with **GitHub Actions** for automated builds and **Docker Compose** production deployment with multi-stage Dockerfiles and health checks.
- Integrated **Playwright** E2E tests across multiple projects (web auth, dashboard auth, mobile) and implemented observability tools for system monitoring.
- Built a hybrid RAG pipeline and implemented **SSE streaming** for real-time responses, backed by a **PostgreSQL** database, demonstrating strong end-to-end feature ownership.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
