SUMMARY

Senior Full-Stack Software Developer with 8 years of experience building scalable, consumer-facing applications and enterprise platforms. Deep expertise in modern frontend development (React, Next.js, TypeScript, Tailwind CSS) and robust backend architecture (NodeJS, NestJS, PostgreSQL). Proven track record of translating complex Figma designs into pixel-perfect, responsive UIs and designing efficient SQL database schemas. Adept at full product ownership, from conceptualizing data models to deploying CI/CD pipelines, with a strong focus on clean code, reusable component libraries, and exceptional user experiences.

CORE COMPETENCIES

- **Frontend Development:** React, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, and responsive UI/UX design.
- **Backend Architecture:** NodeJS, NestJS, REST APIs, and microservices.
- **Databases & Data Modeling:** PostgreSQL, Prisma ORM, SQL, and MongoDB.
- **Design & Collaboration:** Figma-to-code translation, component libraries, and cross-functional product alignment.
- **Testing & Quality:** Playwright, Jest, ESLint, Prettier, and automated CI/CD pipelines.
- **Cloud & Infrastructure:** Docker, GitHub Actions, AWS, and Vercel.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Co-developed a full-stack **Next.js** chat widget powered by a RAG system, enabling users to query complex data in real time via a conversational interface.
- Architected a reusable **design system** and component library in **React** and **Tailwind CSS**, improving UI consistency and developer efficiency across multiple product teams.
- Spearheaded the redesign of a clinical trial data product, translating complex workflows into a modern **React** Chrome extension.
- Optimized application performance by implementing lazy loading, code splitting, and CDN asset delivery, significantly reducing load times.
- Implemented JWT-based authentication and role-based access control in **Next.js**, securely handling tokens and protecting client-side routes.
- Wrote comprehensive end-to-end tests with **Playwright** in the CI/CD pipeline to ensure high reliability of user interfaces.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a 25% boost in user engagement.
- Collaborated closely with product managers and software architects to create a scalable frontend architecture, accelerating development by 30%.
- Translated wireframes and designs into functional implementations, utilizing **Storybook** for documenting reusable React components.
- Optimized frontend performance by identifying render bottlenecks, reducing bundle size by 30-40% and achieving a 35% faster load time.
- Enhanced the development workflow by introducing automated testing frameworks (**Jest**, **Enzyme**), leading to a 20% decrease in bug reports.

Founders Lair Beijing, China (Remote)

Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs to power new features, focusing on testable, maintainable, and well-documented backend services.
- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions met product needs.
- Transformed user journeys and **Figma** designs into reusable **React** components, ensuring a consistent and intuitive user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments on Heroku and production servers on AWS.

SureTrade Business Solutions Nigeria

Frontend Developer *Mar 2018 - Oct 2019*

- Designed database schemas and implemented server-side logic in **NodeJS**, building and testing REST API endpoints for multiple client-facing applications.
- Developed a comprehensive school management portal in a team of 5, handling staff payroll, student records, and guardian communications.
- Responsible for full-stack integration, connecting the **HTML/CSS** and **JavaScript** frontend to **NodeJS** backend services.

PROJECTS

OurNigeria ournigeria.ng

Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 37 states.

- Architected and built an AI-powered data analysis platform as an **Nx monorepo**, managing a **NestJS** backend API, a **Next.js** citizen-facing web app, and an admin dashboard using **TypeScript**.
- Designed the **PostgreSQL** database schema with **Prisma** ORM, developing efficient data models and writing custom migration tooling for robust data management.
- Built the document ingestion pipeline in **NestJS**, processing 700+ complex documents across 37 states with zero ingestion errors.
- Developed the citizen-facing frontend with **React**, **Next.js**, and **Tailwind CSS**, translating UI requirements into responsive, accessible, and dark-mode supported layouts.
- Configured **CI/CD** with **GitHub Actions** for automated builds and **Docker Compose** production deployment with multi-stage Dockerfiles and health checks.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
