SUMMARY

Senior Software Engineer with 8 years of professional experience building business-critical, large-scale applications with a strong focus on TypeScript, Next.js, and NestJS. Proven track record of full SDLC ownership, from architecting robust frontend applications and scalable backend services to implementing CI/CD pipelines using GitHub Actions and deploying to cloud infrastructure (Vercel, AWS). Adept at reducing technical debt, collaborating across cross-functional teams, and delivering pragmatic, product-focused solutions that solve complex operational problems.

CORE COMPETENCIES

- **Languages & Frameworks:** TypeScript, JavaScript (ESNext), React, Next.js, NestJS, NodeJS, Vue.js.
- **Architecture & SDLC:** Full SDLC ownership, Nx Monorepos, API Design, Micro-frontends, SSR/SSG.
- **Cloud & DevOps:** GitHub Actions, Vercel, Docker, AWS, CI/CD Pipelines, pnpm workspaces.
- **State & Data:** Redux, React Query, PostgreSQL, Prisma, MongoDB, GraphQL.
- **Testing & Quality:** Playwright, Jest, Cypress, ESLint, Prettier, Lighthouse, Chrome DevTools.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of a business-critical clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, ensuring seamless data transfer to upstream systems.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, and **Vercel AI SDK**, enabling users to query their data via a conversational interface.
- Implemented **JWT-based authentication** and role-based access control in **Next.js** with **TypeScript** and **React Query**, securing client-side routes and enforcing permission-based UI rendering.
- Architected a reusable design system in **React** and Radix UI, improving UI consistency, accessibility, and developer efficiency across products while reducing technical debt.
- Optimized application performance by implementing lazy loading, code splitting, and efficient asset delivery, significantly reducing load times as measured by **Lighthouse** and Chrome DevTools.
- Promoted engineering teamwork and increased stakeholder confidence by writing end-to-end tests with **Playwright** in the **CI/CD pipeline**, publishing results via **GitHub Actions**.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** and **TypeScript** user interface, achieving a 25% boost in user engagement while collaborating with architects to create a scalable frontend architecture.
- Established engineering standards for code quality, testing, and deployment across the team using ESLint, Prettier, Husky, and **GitHub Actions**, accelerating CI/CD processes and reducing errors.
- Optimized frontend performance and load efficiency by identifying render bottlenecks using React Profiler, reducing bundle size by 30-40% and achieving a 35% faster load time.
- Enhanced the development workflow by introducing automated testing frameworks, including **Jest** and Enzyme, which led to a 20% decrease in bug reports.
- Mentored junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent design across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 engineers to build a high-volume bank Settlement Solution, handling thousands to millions of daily transactions and boosting settlement rates by 80%.
- Spearheaded the development of critical payment modules using **React**, Redux, and RxJS for data streaming.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by 60% through innovative transaction processing strategies.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs to power new features, focusing on testable, maintainable, and well-documented code.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments and production servers on **AWS**.

- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface.

PROJECTS

OurNigeria ournigeria.ng

Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking.

- Architected and built the entire platform as an **Nx monorepo** managing 6 applications, including a **NestJS** API backend, a **Next.js** citizen-facing web app, a Next.js admin dashboard, and a NestJS document ingestion pipeline, all orchestrated with pnpm workspaces.
- Designed the **PostgreSQL** 16 database schema with **Prisma** v7, managing 700+ documents and 708K+ vector embeddings across 37 states with zero ingestion errors.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** end-to-end tests, and **Docker** Compose production deployment with multi-stage Dockerfiles and health checks.
- Built the Next.js frontend with **React** 19 and Tailwind CSS, featuring 22 interactive chart types, URL state management, and responsive layouts.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science, 4.1 CGPA *Graduation Date: Sep 2019*
