SUMMARY

Senior Full Stack Developer with 8 years of professional experience building high-impact B2B SaaS and enterprise applications. Proven expertise in modern TypeScript-first environments, architecting scalable backend services with NestJS and Node.js, and delivering intuitive frontend experiences using React and Vue.js. Adept at driving engineering excellence through comprehensive automated testing (Jest, Playwright), CI/CD pipelines, and modern DevOps practices (Docker, Kubernetes). Thrives in remote-first, high-autonomy teams, taking full ownership of features from design to production deployment.

CORE COMPETENCIES

- **Full Stack Development:** TypeScript, NestJS, Node.js, React, Vue.js, Next.js, and REST APIs.
- **Database & Data Modeling:** PostgreSQL, Prisma, MongoDB, pgvector, and Redis caching concepts.
- **DevOps & Infrastructure:** Docker, Kubernetes, CI/CD (GitHub Actions), Terraform, and Azure/AWS cloud environments.
- **Testing & Quality:** Jest, Playwright, Cypress, Enzyme, ESLint, Prettier, and TDD/BDD methodologies.
- **Architecture & Design:** Micro-frontends, monorepos (Nx), SSR/SSG, and scalable component systems.
- **Leadership & Collaboration:** Remote-first communication, technical architecture reviews, agile methodologies, and product-minded ownership.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Maintained and extended a legacy **Vue.js** codebase while spearheading the migration to a modern **React** application, ensuring zero downtime for clinical trial data transfers.
- Implemented authentication and authorization workflows on the frontend using JWT-based flows, securely handling access and refresh tokens with HTTP-only cookies.
- Increased stakeholder confidence by writing comprehensive end-to-end tests with **Playwright** in the CI/CD pipeline, automating test results reporting on GitHub Pages.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system, enabling users to query data in real time via a conversational interface.
- Optimized application performance by implementing lazy loading, code splitting, and efficient asset delivery, significantly reducing load times as measured by Lighthouse.
- Mentored a team of two junior developers, fostering a culture of technical excellence in a remote-first environment.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive user interface using **React** and **TypeScript**, achieving a 25% boost in user engagement for a B2B SaaS product.
- Enhanced the development workflow by introducing automated testing frameworks, including **Jest** and Enzyme, which led to a 20% decrease in bug reports.
- Established engineering standards for code quality, testing, and deployment using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, accelerating CI/CD processes.
- Drove a 40% improvement in React application performance by optimizing caching mechanisms and resolving render bottlenecks using React Profiler.
- Collaborated creatively with software architects to create a scalable frontend architecture, enhancing seamless backend integration and accelerating development by 30%.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **Node.js** RESTful APIs to power new features, focusing on testable, maintainable, and well-documented code.
- Translated business requirements into efficient **MongoDB** database models and schemas, collaborating closely with the business team.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments and production servers on AWS and Heroku.
- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent user interface.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 engineers to build a high-volume bank Settlement Solution, boosting transaction settlement rates by 80%.
- Developed critical modules using **React** with Redux for state management and Axios for asynchronous API requests.
- Enhanced system performance by adopting the native browser EventSource API for real-time data streaming.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented them in **Node.js** for multiple applications.
- Responsible for server-side web application logic as well as integration of the frontend using JavaScript, HTML, and CSS.
- Tested user-defined functions, triggers, and API endpoints.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

- Architected and built the entire platform as an **Nx monorepo** managing 6 applications, including a **NestJS API backend**, a **Next.js** citizen-facing web app, and a document ingestion pipeline, demonstrating full-stack ownership.
- Designed the **PostgreSQL 16** database schema with **Prisma v7**, implementing efficient data models and custom migration tooling for a complex multi-agent AI system.
- Configured CI/CD with **GitHub Actions** for automated builds and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.
- Built the Next.js frontend with **React 19** and Tailwind CSS, featuring 22 interactive chart types and responsive mobile layouts.
- Expanded automated test coverage across the stack using **Playwright** for end-to-end tests across 4 projects (web auth, dashboard auth, desktop Chrome, mobile Pixel 5).

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
