SUMMARY

Senior Full Stack Engineer with 8 years of professional experience building high-throughput, resilient web applications and microservices. Proven expertise in architecting end-to-end solutions using Vue.js, NestJS, TypeScript, and PostgreSQL (Prisma). Demonstrated success in designing systems that process millions of daily transactions, deploying continuously to production environments (AWS, Docker), and collaborating across cross-functional teams to deliver polished, operator-facing and customer-facing interfaces.

CORE COMPETENCIES

- **Frontend Architecture:** Vue.js, TypeScript, React, Next.js, Tailwind CSS, Storybook, and responsive UI/UX implementation.
- **Backend & Data:** NestJS, NodeJS, PostgreSQL, Prisma ORM, REST APIs, and database schema design.
- **Cloud & Infrastructure:** AWS (S3, CloudFront), Docker, CI/CD pipelines (GitHub Actions), and monorepo orchestration (Nx).
- **System Design:** High-throughput transaction processing, event-driven architectures, real-time data streaming (SSE, EventSource), and microservices.
- **Testing & Quality:** Playwright, Jest, Cypress, ESLint, Prettier, and automated CI-driven QA.
- **Leadership:** End-to-end feature ownership, technical architecture reviews, mentorship, and agile product development.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Maintained and extended a legacy **Vue.js** codebase for a clinical trial data product, fixing bugs and shipping features in parallel with a modern rebuild in React and **TypeScript**.
- Co-developed a full-stack **Next.js** application powered by a RAG system, implementing both the frontend interface and backend API integrations.
- Optimized application performance by implementing lazy loading, code splitting, and efficient asset delivery via **AWS** (CloudFront, S3), significantly reducing load times.
- Implemented **JWT-based authentication** and role-based access control workflows, securely handling access tokens and collaborating closely with backend engineers on API design.
- Increased stakeholder confidence by writing end-to-end tests with **Playwright** in the **CI/CD pipeline**, automating test reporting on every push.
- Architected a reusable design system that improved UI consistency, accessibility, and developer efficiency across operator-facing products.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive user interface using **TypeScript** and React, collaborating with software architects to create a scalable architecture and accelerate development by 30%.
- Utilized **Storybook** for documenting components, streamlining change management and ensuring clear communication of UI/UX improvements with design teams.
- Optimized frontend performance and load efficiency by identifying render bottlenecks, reducing bundle size by 30-40%, and achieving a 35% faster load time across devices.
- Established engineering standards for code quality, testing, and continuous deployment across the team using ESLint, Prettier, Husky, and **GitHub Actions**, accelerating CI/CD processes.
- Enhanced the development workflow by introducing automated testing frameworks (Jest, Enzyme), leading to a 20% decrease in production bug reports.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in a team of 3, significantly enhancing transaction processing capabilities to handle **thousands to millions of transactions daily**, boosting settlement rates by 80%.
- Spearheaded the development of critical payment modules (MasterCard, VISA, Express-cash) using React, Redux, and Axios for asynchronous API requests.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by 60% through innovative transaction processing and data management strategies.

- Enhanced system performance and user experience by adopting the native EventSource API for real-time data streaming, ensuring fast data updates for high-throughput operations.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs to power new features, focusing on testable, maintainable, and well-documented code.
- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions met requirements.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments and production servers on **AWS** and Heroku.
- Transformed user journeys and Figma designs into reusable frontend components, ensuring a consistent, intuitive user interface.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed database schemas and implemented them in **NodeJS** for multiple applications, taking responsibility for server-side web application logic and frontend integration.
- Worked with a team of 5 to develop SureEdu, a school management portal for handling staff payroll, student attendance, and reporting.
- Tested user-defined functions, triggers, and API endpoints, ensuring reliability across the full stack.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected and built the entire platform as an Nx monorepo managing 6 applications, including a **NestJS** API backend, a document ingestion pipeline, and multiple Next.js web applications.
- Designed the **PostgreSQL 16** database schema with **Prisma v7**, writing custom migration tooling and optimizing data models for complex queries.
- Configured CI/CD with **GitHub Actions** for automated builds, Playwright end-to-end tests, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.
- Implemented full-stack features end-to-end, from database schema through the NestJS API to the polished, responsive UI using Tailwind CSS and Recharts.
- Built a robust document ingestion pipeline processing 700+ documents (PDF, XLSX, JSON) with zero ingestion errors, demonstrating strong attention to production reliability.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Graduation Date: Sep 2019*
