PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 8 years of professional experience specializing in TypeScript, React, and Node.js. Proven track record of owning end-to-end product development, modernizing legacy codebases, and architecting scalable systems in agile environments. Deep expertise in building robust backend services with Express and NestJS, managing MongoDB and SQL databases, and ensuring high code quality through automated testing (Jest, Playwright, Cypress) and clean architecture principles.

CORE COMPETENCIES / TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript (ESNext), React, Node.js, Express, Next.js, NestJS, Redux.
- **Databases & APIs:** MongoDB, PostgreSQL (SQL), REST APIs, Prisma, GraphQL.
- **Testing & Quality:** Jest, Cypress, Playwright, Enzyme, ESLint, Prettier, TDD/BDD.
- **Architecture & DevOps:** Software architecture, clean code, CI/CD, GitHub Actions, Docker, Nx monorepos.

PROFESSIONAL EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer (React / TypeScript) *May 2023 - Present*

- Spearheaded the modernization of the main clinical trial data product, migrating from a legacy Vue.js web application to a modern **React** and **TypeScript** architecture, optimizing workflows for clinical site integrations.
- Introduced **Redux** for state management and refactored legacy React code from class components to functional components, significantly improving developer experience and codebase maintainability.
- Architected a reusable design system in React, improving UI consistency and accelerating feature delivery across the engineering team.
- Increased stakeholder confidence by writing comprehensive end-to-end tests with **Playwright** in the CI/CD pipeline, ensuring robust releases.
- Optimized application performance by implementing lazy loading, code splitting, and efficient asset delivery, significantly reducing load times.
- Mentored two junior developers, fostering a culture of technical excellence, clean code, and software architecture best practices.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive user interface using **React** and **TypeScript**, achieving a 25% boost in user engagement.
- Collaborated closely with software architects to create a scalable frontend architecture, enhancing seamless backend integration and accelerating development by 30%.
- Enhanced the development workflow by introducing automated testing frameworks, including **Jest** and Enzyme, which led to a 20% decrease in bug reports.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks, reducing bundle size by 30-40% and achieving a 35% faster load time.
- Established engineering standards for code quality, testing, and deployment across the team using ESLint, Prettier, Husky, and GitHub Actions.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in an agile team, significantly enhancing transaction processing capabilities to handle thousands to millions of daily transactions, boosting settlement rates by 80%.
- Spearheaded the development of critical modules, including E-commerce and payment gateways, using **React** with **Redux** for state management.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by 60% through innovative data management strategies.
- Built dynamic data visualization dashboards using React, streamlining the management of user roles and permissions.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **Node.js** RESTful APIs to power new features, focusing on testable, maintainable, and well-documented code.
- Translated business requirements into efficient **MongoDB** database models and schemas, collaborating closely with the product team.

- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments and production servers.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented them in **Node.js** for multiple applications.
- Responsible for server-side web application logic as well as integration of the frontend using JavaScript, HTML, and CSS.
- Developed user use cases and converted them into database schemas and models.
- Tested user-defined functions, triggers, and API endpoints to ensure system reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking.

- Architected and built the entire platform as an Nx monorepo managing 6 applications, including a **Node.js (NestJS)** API backend and a **React (Next.js)** web app.
- Designed the **SQL (PostgreSQL)** database schema with Prisma, including pgvector extension for vector storage, and wrote custom migration tooling.
- Configured CI/CD with GitHub Actions for automated builds, **Playwright** end-to-end tests, and Docker Compose production deployment.
- Implemented authentication, session management, and real-time data streaming features.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Graduation Date: Sep 2019*
