Hiring Team
DKB Code Factory
Berlin, Germany

Dear Hiring Team,

I am writing to express my strong interest in the Frontend Developer (React) position at DKB Code Factory. With 8+ years of experience building secure, performant React applications in high-stakes, data-sensitive environments, I am excited by the opportunity to help build payment experiences that millions of banking customers rely on every day.

At Roche Genentech, I scaled state management in a large Next.js application by integrating **Redux** for complex client state and **React Query** for cached API data — an architecture closely aligned with your Redux/RTKQ stack. I also integrated **Playwright end-to-end tests** into our CI/CD pipeline with automated Allure reporting and Slack notifications, ensuring the release reliability and code quality that mission-critical applications demand. By building a reusable design system with **Radix UI**, I drove accessibility compliance and UI consistency across multiple product teams, directly reflecting your emphasis on accessible, responsive interfaces built to exacting standards.

What draws me to DKB Code Factory is the chance to apply this experience to core banking products where frontend craftsmanship directly impacts customer trust. At DESCASIO, I owned the frontend architecture for a data-heavy **React** dashboard, reducing bundle size by **30–40%** and achieving **35% faster load times** — the kind of performance optimization that matters when millions depend on your platform daily. I established engineering standards using ESLint, Prettier, and GitHub Actions, and I thrive in agile, sprint-based environments where I take full ownership of features from planning through delivery.

I am fluent in English and comfortable working in hybrid, asynchronous teams using tools like Teams and Slack. I would welcome the opportunity to discuss how my deep experience with **TypeScript, React, Redux, Playwright**, and **Storybook** can contribute to DKB Code Factory's mission of building technology that truly serves people.

Best regards,

Ogbonna Arinze
