SUMMARY

Senior Frontend Developer with 8+ years of experience building secure, performant, and accessible web applications using React, TypeScript, Redux, and Styled Components. Proven track record of taking full ownership of frontend features end-to-end in agile, sprint-driven teams, delivering reliable code backed by comprehensive testing with Playwright, Storybook, and Vitest. Experienced in collaborating closely with backend engineers and product partners to define APIs and feature scope, ensuring clear alignment and predictable delivery within hybrid work environments.

CORE COMPETENCIES

- **Frontend Development:** React, TypeScript, Redux, RTK Query (RTKQ), Styled Components, and responsive/accessible UI development.
- **Testing & Quality:** Playwright end-to-end testing, Vitest, Storybook component testing, Jest, and CI-driven automated QA pipelines.
- **Architecture & Tooling:** Scalable component systems, design systems, SSR/SSG with Next.js, Webpack/Vite build pipelines, and monorepos.
- **Accessibility & UX:** WCAG-compliant interfaces, responsive design, internationalization (i18next), and Figma-to-code workflows.
- **Performance Engineering:** Code splitting, lazy loading, bundle optimization, CDN strategies, Core Web Vitals, and rendering profiling.
- **Agile & Collaboration:** Two-week sprint cadences, daily stand-ups, refinement, retrospectives, and proactive asynchronous communication.
- **API & Integration:** RESTful APIs, GraphQL, React Query for server state, JWT authentication, and backend API collaboration.
- **CI/CD & DevOps:** GitHub Actions, automated test pipelines, ESLint/Prettier enforcement, feature flags, and release strategies.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Took **full ownership** of frontend feature delivery end-to-end within **two-week sprints**, consistently meeting sprint goals with quality and predictability while collaborating proactively with backend engineers and product partners to clarify **APIs and feature scope**.
- Architected a **reusable design system** in **React** and **TypeScript** with accessible, responsive components, improving UI consistency across products and accelerating development velocity for the team.
- Scaled **state management** in a large application by integrating **Redux** and **RTK Query** for complex client state and cached API data, streamlining data flow, eliminating redundant re-renders, and establishing maintainable patterns that accelerated developer onboarding.
- **Optimized** application performance in a **React** and **TypeScript** SPA by implementing **lazy loading, code splitting**, and dynamic imports, reducing load times significantly. Profiled and resolved bottlenecks using **Lighthouse** and Chrome DevTools, improving Core Web Vitals scores.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating test reporting with Allure Reports and configuring real-time notifications for build quality visibility on every push.
- Engineered **JWT-based authentication** and **role-based access control** in a **Next.js** frontend with **TypeScript** and **React Query**, implementing HTTP-only cookies for secure token handling and permission-based UI rendering.

DESCASIO LTD — Lagos, Nigeria
Staff Frontend Engineer — *May 2021 - Apr 2022*

- **Owned** the core **frontend architecture** for a data-heavy **React** dashboard, implementing virtualization and efficient **state management** with **Redux** to handle large datasets seamlessly while maintaining smooth, **responsive** UI interactions.

- **Optimized** frontend performance by identifying render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by **30%-40%** through bundle analysis tooling, achieving a **35% faster load time** and smoother runtime experience across devices.
- **Established** engineering standards for **code quality, testing**, and deployment across the team using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- **Mentored** junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent design across projects.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
