Hiring Manager
Ingestro
Berlin, Germany

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Frontend Engineer position at Ingestro. With 8+ years of professional experience building scalable, high-performance frontend systems using React and TypeScript, and a proven record of owning frontend architecture for data-intensive products, I am confident I can take ownership of the frontend domain across your Data Pipeline product and drive the quality, consistency, and engineering maturity your team is building toward.

In my current role at Roche Genentech, I led the frontend architecture for a clinical trial data platform, designing a reusable design system with ReactJS and Radix UI that improved consistency, accessibility, and developer efficiency across multiple product surfaces. I scaled state management in a large Next.js application by integrating Redux and React Query, cutting redundant re-renders and accelerating developer onboarding through maintainable patterns. I also drove release reliability by integrating Playwright end-to-end tests into the CI/CD pipeline with automated reporting, giving teams real-time visibility into build quality. These experiences align directly with Ingestro's need for someone who can shape design systems, establish testing and performance best practices, and ensure smooth integration with APIs and platform services.

Beyond technical execution, I am passionate about raising the bar through mentorship and collaboration. At DESCASIO, I owned the frontend architecture for a data-heavy React dashboard, established engineering standards for code quality and deployment using ESLint, Prettier, and GitHub Actions, and mentored junior engineers through structured code reviews and pair programming. I also bring experience with Vue.js, AWS cloud services, and AI-powered development tooling, which I understand are valued at Ingestro. I thrive in agile, fast-paced environments and communicate effectively across distributed teams.

Ingestro's mission to disrupt the B2B landscape and empower businesses toward operational excellence resonates strongly with me. I am excited about the opportunity to shape the long-term frontend strategy, improve your design system, and collaborate closely with Product and Backend to deliver an exceptional user experience. I would welcome the opportunity to discuss how my experience can contribute to Ingestro's growth.

Sincerely,

Ogbonna Arinze
