SUMMARY

Senior Frontend Engineer with 8+ years of experience building scalable, high-performance web applications using React and TypeScript. Proven track record of owning frontend architecture for data-intensive products, shaping design systems, and driving UI/UX standards across multiple codebases. Skilled at establishing engineering best practices around state management, performance optimization, accessibility, and testing while mentoring teams to elevate frontend maturity. Passionate about collaborating with Product, Design, and Backend to deliver clean, maintainable, and API-driven user experiences in fast-paced, agile environments.

CORE COMPETENCIES

- **Frontend Architecture:** Scalable component systems, design systems, monorepos, SSR/SSG/ISR strategies, and large-scale component design.
- **Programming Languages:** TypeScript, modern JavaScript (ESNext), NodeJS, and Python.
- **Frameworks & Tools:** React, Next.js, Vue.js, Tailwind, Redux, Storybook, Webpack/Vite/Rollup, and SDK development.
- **State Management & Performance:** Redux, React Query, rendering optimization, code splitting, memoization, Core Web Vitals, and client-side debugging.
- **Design Systems & UX Engineering:** Component patterns, accessibility (WCAG), cross-platform consistency, and Figma-to-code workflows.
- **Quality & Testing:** Jest, Cypress, Playwright, CI-driven QA, automated testing, feature flags, and structured code reviews.
- **Cloud & Infrastructure:** AWS (CloudFront, S3), Vercel, Dockerized frontends, CI/CD automation, and cloud-native integrations.
- **API & Integration:** REST, GraphQL, real-time APIs, API-driven product development, and client-side security best practices.
- **Leadership & Collaboration:** Technical direction, architecture reviews, mentorship, pair programming, Agile/Scrum, and cross-functional team collaboration.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Architected the frontend for a clinical trial data platform, designing a reusable **design system** in **ReactJS** and **Radix UI** that improved consistency, accessibility, and developer efficiency across multiple product surfaces.
- Transformed a legacy **Vue.js** web app into a **ReactJS Chrome extension**, optimizing clinical site workflows and boosting adoption by collaborating closely with Design and Backend teams on API integrations.
- Optimized application performance in a **ReactJS** and **TypeScript** SPA by implementing lazy loading, **code splitting**, dynamic imports, and image optimization, reducing load times significantly. Leveraged **Lighthouse** and **Chrome DevTools** for client-side debugging and bottleneck resolution.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow, cutting redundant re-renders, and accelerating developer onboarding through consistent, maintainable patterns.
- Enhanced security and UX by developing **JWT-based authentication** and role-based access control in a **Next.js** frontend with **TypeScript** and **React Query**, collaborating with backend teams to enforce permission-based UI rendering.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating test reporting with Allure Reports, and configuring Slack notifications for real-time build quality visibility.

DESCASIO LTD — Lagos, Nigeria
Staff Frontend Engineer — *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a data-heavy **React dashboard**, implementing virtualization and efficient **state management** to handle large datasets seamlessly across the product.
- Optimized frontend performance by identifying render bottlenecks using **React Profiler** and **Lighthouse**, reducing bundle size by 30-40% through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a 35% faster load time.
- Established engineering standards for **code quality**, **testing**, and deployment across the team using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- **Mentored** junior engineers and drove frontend best practices through **code reviews**, **pair programming**, and knowledge sharing, fostering a culture of maintainable, high-quality code and consistent design.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
