SUMMARY

Senior Frontend Engineer with 8+ years of experience building reusable, modular frontend component systems and visually polished web applications using modern JavaScript frameworks, TypeScript, and advanced CSS. Proven track record of optimizing frontend performance, reducing load times, and delivering seamless responsive experiences across desktop, tablet, and mobile devices. Skilled at integrating frontend components with backend APIs and services, with deep expertise in Webpack build tooling, AWS cloud infrastructure, and reactive state management patterns including RxJS-style observables. Passionate about continuous learning, staying current with frontend technologies, and collaborating across cross-functional teams to deliver high-quality, scalable user experiences.

CORE COMPETENCIES

- **CSS & Visual UI:** Advanced CSS3, responsive layouts, mobile-first design, Tailwind CSS, design systems, cross-platform visual consistency, and Figma-to-code workflows.
- **JavaScript & TypeScript:** Modern JavaScript (ES6+), TypeScript, reactive programming patterns (RxJS/observables), and strong HTML5 fundamentals.
- **Frameworks:** React.js, Next.js, Vue.js, component-based architectures, and experience with reactive frameworks and Angular-style patterns.
- **Build Tools & Package Managers:** Webpack, Vite, Rollup, npm, Yarn, custom build pipelines, and monorepo tooling.
- **Performance Engineering:** Rendering optimization, code splitting, lazy loading, CDN strategies, Core Web Vitals, and Lighthouse/Chrome DevTools profiling.
- **Responsive Design:** Mobile-first development, fluid layouts, cross-device testing, accessibility (WCAG), and adaptive UI patterns.
- **Cloud & Infrastructure:** AWS (CloudFront, S3), Vercel, Docker, CI/CD automation with GitHub Actions, and edge rendering.
- **API Integration & Collaboration:** RESTful APIs, GraphQL, JWT authentication, backend service integration, and cross-functional team workflows.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Developed a library of **reusable, modular frontend components** in **React.js** and **TypeScript** with pixel-perfect **CSS** styling, building a design system that improved visual consistency and developer efficiency across multiple products serving thousands of users.
- **Implemented responsive design** principles using advanced **CSS3** layouts, media queries, and fluid grids to ensure seamless user experiences across **desktop, tablet, and mobile devices**, leveraging Radix UI primitives for accessible, cross-platform components.
- **Optimized frontend performance** and load times in a **TypeScript**-based SPA by implementing **lazy loading, code splitting**, dynamic imports, and image optimization, reducing initial load times by over 40%. Identified and resolved **performance bottlenecks** using **Lighthouse** and Chrome DevTools to improve Core Web Vitals scores.
- Scaled **state management** using **reactive, observable patterns** with Redux and React Query for complex client state and cached API data, cutting redundant re-renders and establishing maintainable, **scalable** patterns across a growing frontend codebase.
- **Collaborated with backend developers** to integrate frontend components with **backend APIs and services**, implementing JWT-based authentication, role-based access control, and permission-based UI rendering in a **Next.js** frontend with React Query.
- Increased release reliability by integrating **Playwright end-to-end tests** into the CI/CD pipeline built with **Webpack** and **npm**, automating test reporting and configuring real-time Slack notifications for build quality visibility.

DESCASIO LTD — Lagos, Nigeria
Staff Frontend Engineer — *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a data-heavy **React** dashboard, building **modular, reusable components** with advanced **CSS** styling, virtualized rendering, and efficient state management to handle large datasets seamlessly across devices.
- **Optimized frontend performance** and **load times** by identifying render bottlenecks using React Profiler and **Lighthouse** Audits, reducing bundle size by **30%-40%** through **Webpack** bundle analysis tooling, achieving a **35% faster load time** and smoother runtime experience.
- **Established** engineering standards for code quality, testing, and deployment across the team using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, reducing errors and accelerating **CI/CD** processes.
- **Mentored** junior engineers and guided frontend best practices, fostering a culture of high-quality, **maintainable** code and consistent component-based design across projects.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
