SUMMARY

Frontend Software Developer with 8+ years of experience building high-impact, data-intensive web applications using **React**, **TypeScript**, and modern frontend technologies. Proven track record of architecting scalable frontend systems, developing complex **data visualizations** and **analysis workflows** that render large datasets, and delivering exceptional **UX/UI** for enterprise SaaS products. Experienced in **agile, self-managed DevOps teams**, with strong expertise in **testing frameworks** (Jest, Vitest, Storybook, Cypress, Playwright), **AI-assisted development tools**, and a passion for building efficient, sustainable software.

CORE COMPETENCIES

- **Frontend Development:** React, TypeScript, Next.js, CSS/HTML, Tailwind, Redux, Radix UI, and scalable component architectures.
- **Data Visualization & Analytics UI:** Complex data rendering, virtualization for large datasets, analysis workflows, and performance-optimized dashboards.
- **Testing & Quality:** Jest, Vitest, Cypress, Playwright, Storybook, CI-driven QA, automated test reporting, and visual regression testing.
- **UX/UI Engineering:** Design systems, accessibility (WCAG), Figma-to-code workflows, cross-platform consistency, and enterprise UX patterns.
- **Performance Engineering:** Code splitting, lazy loading, memoization, bundle optimization, Core Web Vitals, and CDN strategies.
- **DevOps & Tooling:** CI/CD pipelines (GitHub Actions), Webpack/Vite/Rollup, ESLint, Prettier, Docker, AWS CloudFront/S3, and AI-assisted development (GitHub Copilot, Cursor).
- **Additional Skills:** Python, NodeJS, GraphQL, REST APIs, Agile/Scrum methodologies, and technical mentorship.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)

Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Architected the frontend for a **data-intensive clinical trial platform**, designing a reusable **design system** in **ReactJS** and **Radix UI** that improved UI consistency, accessibility, and developer efficiency across multiple products.
- Developed complex **data analysis workflows** and **visualizations** for large-scale clinical datasets, enabling stakeholders to derive actionable insights from production data through intuitive, performance-optimized interfaces.
- **Optimized** application performance in a **React** and **TypeScript**-based SPA by implementing lazy loading, code splitting, dynamic imports, and image optimization, reducing load times significantly. Enhanced responsiveness using memoization and efficient **CDN asset delivery**, profiling with Lighthouse and Chrome DevTools.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow and cutting redundant re-renders across data-heavy views.
- Increased release reliability by integrating **Playwright end-to-end tests** and **Cypress** component tests into the **CI/CD pipeline**, with automated **Allure Reports** and Slack notifications for real-time build quality visibility.
- Leveraged **AI-assisted development tools** (GitHub Copilot, Cursor) to accelerate feature delivery, improve code quality, and enhance testing coverage across the frontend codebase.

DESCASIO LTD Lagos, Nigeria

Staff Frontend Engineer *May 2021 - Apr 2022*

- Owned the core frontend architecture for a **data-heavy React dashboard**, implementing **virtualization** and efficient state management to handle and **render large datasets** seamlessly — directly applicable to manufacturing analytics interfaces.
- **Optimized** frontend performance by identifying and resolving render bottlenecks using **React Profiler** and Lighthouse Audits, reducing bundle size by 30-40% through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Established engineering standards for **code quality**, **testing**, and deployment using **ESLint**, **Prettier**, Husky, Lint-staged, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- **Mentored** junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent UX/UI design across the application.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
