SUMMARY

Frontend Software Engineer with 8+ years of experience shipping **production-grade, user-facing interfaces** using **React, TypeScript, and modern JavaScript** across large-scale, performance-critical platforms. Proven track record of building **super-refined, elegant user interfaces** that delight millions of users, with deep expertise in component architecture, **design systems**, and rendering optimization. Experienced in collaborating cross-functionally with Product, Design, and Data teams to harness **engagement metrics** and deliver impactful features on popular browsers. Passionate about contributing to **technical culture** and engineering excellence through best practices, continuous integration, and automated testing.

CORE COMPETENCIES

- **Languages & Core Stack:** TypeScript, modern JavaScript (ESNext), HTML, CSS, NodeJS, and Python for building scalable, accessible user interfaces.
- **Frameworks & UI Libraries:** React, Next.js, Vue.js, Radix UI, Tailwind CSS, Redux, Storybook, and shadcn/ui for elegant, production-grade component systems.
- **Performance & Build Tools:** Webpack, Vite, Rollup, code splitting, lazy loading, bundle analysis, CDN strategies, Core Web Vitals, and Chrome DevTools profiling.
- **Testing & Quality:** Jest, Playwright, Cypress for automated and end-to-end testing, Storybook for visual regression, ESLint, and CI-driven QA pipelines.
- **CI/CD & Delivery:** GitHub Actions, continuous integration and delivery pipelines, feature flags, canary deploys, and automated release strategies.
- **Data & APIs:** REST, GraphQL, React Query (TanStack Query), real-time APIs, engagement metrics instrumentation, and A/B testing infrastructure.
- **Engineering Fundamentals:** Algorithms, data structures, design patterns, functional programming patterns, system design, and architecture reviews.
- **Collaboration:** Cross-functional teamwork with Product, Design, Growth, and Data teams, Agile methodologies, code reviews, mentorship, and technical culture stewardship.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)

Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Shipped **production-grade React and TypeScript interfaces** for a clinical data platform serving thousands of daily active users, building super-refined UI components with **Radix UI** and Tailwind CSS that improved consistency, accessibility, and developer velocity across multiple product lines.
- Delivered impactful browser-based features by transforming a legacy Vue.js web app into a **ReactJS Chrome extension**, collaborating closely with Product and Design teams to optimize clinical site workflows and drive user adoption through intuitive, elegant interfaces.
- Optimized application performance in a **React and TypeScript SPA** by implementing **lazy loading, code splitting**, dynamic imports, and image optimization, reducing initial load times by over 40% as measured by Lighthouse and Chrome DevTools, ensuring a seamless experience on popular browsers.
- Scaled **state management** in a large **Next.js** application by integrating **React Query** for cached API data and **Redux** for complex client state, cutting redundant re-renders and establishing maintainable, well-documented patterns that accelerated developer onboarding.
- Harnessed **engagement metrics** and user behavior data to identify UI bottlenecks and prioritize high-impact features, collaborating with Data and Product teams to deliver data-driven improvements that increased user engagement across key workflows.
- Grew the team's **technical excellence** by integrating **Playwright end-to-end tests** into the **CI/CD pipeline** via GitHub Actions, automating test reporting with Allure Reports, and configuring Slack notifications for real-time build quality visibility on every push.

DESCASIO LTD — Lagos, Nigeria

Staff Frontend Engineer *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a data-heavy **React dashboard** serving large-scale datasets, implementing **virtualization** and efficient state management to deliver performant, elegant interfaces across devices and browsers.
- Optimized **frontend performance** by resolving render bottlenecks using **React Profiler** and Lighthouse Audits, reducing **bundle size by 30-40%** through webpack-bundle-analyzer, achieving a **35% faster load time** and significantly smoother runtime experience.
- Contributed to **technical culture** by establishing engineering standards for code quality, **testing**, and **continuous delivery** using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, reducing errors and accelerating CI/CD processes across the team.
- Mentored junior engineers and guided **frontend best practices**, fostering a culture of high-quality, maintainable code and consistent design patterns across projects.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
