SUMMARY

Senior Frontend Engineer with 8+ years of experience building high-impact, consumer-facing web and mobile applications for e-commerce, marketplace, and B2C platforms. Expert in architecting performant, pixel-perfect frontend systems using React, Next.js, Redux, TypeScript, and React Native, with a passion for smooth animations, clean design systems, and brilliant customer journeys. Proven track record of building products from scratch with significant autonomy, driving UI excellence, and shipping features that directly improve user engagement and conversion.

CORE COMPETENCIES

- **Frontend Architecture:** Scalable React component systems, design systems, monorepos, SSR/SSG/ISR strategies, and micro-frontends.
- **Programming Languages:** TypeScript, modern JavaScript (ESNext), HTML5, CSS3, NodeJS, and Python.
- **Frameworks & Libraries:** React, Next.js, React Native, Redux, Tailwind CSS, Storybook, and Webpack/Vite/Rollup.
- **UI/UX & Animation:** Pixel-perfect Figma-to-code workflows, CSS animations, Framer Motion, responsive design, and WCAG accessibility.
- **E-Commerce & B2C:** Marketplace platforms, customer journey optimization, conversion-driven UI, and product catalog experiences.
- **Performance Engineering:** Rendering optimization, code splitting, lazy loading, CDN strategies, Core Web Vitals, and bundle analysis.
- **Quality & Reliability:** Automated testing (Jest, Cypress, Playwright), CI/CD pipelines, visual regression testing, and feature flags.
- **Cloud & Infrastructure:** AWS CloudFront/S3, Vercel, Docker, edge rendering, and CI/CD automation via GitHub Actions.
- **API & Integration:** GraphQL, REST, real-time APIs, modern auth flows (JWT, OAuth), and client-side security best practices.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Architected a **reusable design system** in **ReactJS** and **Radix UI**, establishing a scalable component library that improved UI consistency, accessibility, and developer velocity across multiple product teams.
- **Optimized** application performance in a **React** and **TypeScript** SPA by implementing **lazy loading, code splitting, dynamic imports**, and image optimization, delivering significantly faster load times. Enhanced responsiveness with **CSS animations**, memoization, and efficient **CDN asset delivery**, using Lighthouse and Chrome DevTools to identify and resolve bottlenecks.
- Engineered **JWT-based authentication** and **role-based access control** in a **Next.js** frontend with **TypeScript** and **React Query**, implementing HTTP-only cookies for secure token handling and permission-based UI rendering for an enhanced user experience.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow, eliminating redundant re-renders, and establishing maintainable patterns that accelerated developer onboarding.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating test reporting with Allure Reports and configuring real-time **Slack notifications** for build quality visibility on every push.
- Transformed a legacy Vue.js web app into a **ReactJS Chrome extension**, optimizing workflows and enhancing adoption by collaborating closely with design and backend teams.

DESCASIO LTD — Lagos, Nigeria
Staff Frontend Engineer — *May 2021 - Apr 2022*

- **Owned** the core **frontend architecture** for a consumer-facing **React dashboard**, implementing virtualization and efficient state management with **Redux** to handle large datasets seamlessly while maintaining smooth UI interactions.

- **Optimized** frontend performance by identifying render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by **30%-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time** and smoother runtime experience across devices.
- **Established** engineering standards for code quality, testing, and deployment across the team using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- **Mentored** junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent design across projects.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
