SUMMARY

Frontend Engineer with 8+ years of experience combining strong coding expertise with a keen design sensibility to build **pixel-perfect, high-performance web applications** using **React, Next.js, TypeScript, and Tailwind CSS**. Proven ability to own end-to-end UI implementation, from translating **Figma designs** into production-ready code to architecting scalable **design systems** that ensure consistency across complex, data-rich platforms. Experienced in building campaign management dashboards, data visualizations, and interactive interfaces in collaborative, agile environments. Passionate about creating intuitive user experiences and leveraging **GenAI tools** to optimize development speed and code quality.

CORE COMPETENCIES

- **Core Stack:** React, Next.js (App Router), TypeScript, Tailwind CSS, shadcn/ui, and modern JavaScript (ESNext) for building scalable, accessible user interfaces.
- **State & Data Management:** TanStack Query (React Query) for robust data fetching and caching, Redux for complex client state, Zod and React Hook Form for type-safe form validation.
- **UI/UX Implementation:** Design systems, accessible component libraries (Radix UI, shadcn/ui, WCAG), Figma-to-code workflows, pixel-perfect prototyping, and cross-device responsive design.
- **Performance Engineering:** Rendering optimization, lazy loading, code splitting, bundle analysis (Webpack/Vite), CDN strategies, Core Web Vitals, and Chrome DevTools profiling.
- **Quality & CI/CD:** Playwright and Jest automated testing, GitHub Actions pipelines, Storybook, ESLint, and continuous integration best practices.
- **Infrastructure:** Docker, GCP, Kubernetes fundamentals, Vercel, and containerized frontend deployments.
- **Collaboration & AI:** Agile methodologies, cross-functional teamwork with designers, PMs, and backend engineers, GenAI tools (Cursor, LLMs) for accelerated development.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)

Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Architected and maintained a reusable **design system** in **React** and **TypeScript** using **Radix UI** and **Tailwind CSS**, delivering accessible, consistent UI components that improved developer efficiency and visual coherence across multiple products.
- Built complex **data visualization dashboards** and campaign-style management views, translating high-fidelity **Figma designs** into **pixel-perfect, production-ready code** through close collaboration with UX designers and product managers.
- Optimized application performance in a **Next.js** and **TypeScript** SPA by implementing **lazy loading**, **code splitting**, dynamic imports, and image optimization, reducing initial load times by over 40% as measured by **Lighthouse** and Chrome DevTools profiling, ensuring a seamless experience across devices.
- Scaled **state management** in a large **Next.js** application by integrating **React Query** for cached API data and **Redux** for complex client state, cutting redundant re-renders and establishing maintainable patterns that accelerated developer onboarding.
- Implemented **JWT-based authentication** and role-based access control in a Next.js frontend with **TypeScript** and **React Query**, collaborating with backend engineers to ship secure, permission-based UI rendering end to end.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline** via **GitHub Actions**, automating test reporting and configuring Slack notifications for real-time build quality visibility on every push.

DESCASIO LTD — Lagos, Nigeria

Staff Frontend Engineer — *May 2021 - Apr 2022*

- Owned the end-to-end **frontend architecture** for a **data-heavy React dashboard**, implementing **virtualization** and efficient state management to handle large datasets seamlessly, delivering performant views for analytics, targeting options, and real-time data across devices.

- Optimized **frontend performance** by identifying and resolving render bottlenecks using **React Profiler** and Lighthouse Audits, reducing **bundle size by 30-40%** through webpack-bundle-analyzer, achieving a **35% faster load time** and smoother runtime experience.
- Established engineering standards for code quality, **testing**, and deployment using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, reducing errors and accelerating **CI/CD processes** across the team.
- Mentored junior engineers and guided **frontend best practices**, fostering a culture of high-quality, maintainable code and consistent design system usage across projects.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
