Joanna Thiesler
Recruiting Team
eRecht24 GmbH & Co. KG
Berlin / Dortmund / Magdeburg, Germany

Dear Joanna Thiesler,

I have been following eRecht24's mission to help thousands of companies operate legally and securely on the internet. Building long-lasting, business-critical web applications requires a rigorous focus on architecture, performance, and code quality. With 8 years of professional experience scaling complex frontend systems using React and TypeScript, I am excited to apply for the Senior Frontend Engineer position to help shape the technical direction of your legal tech platforms.

In my current role as a Frontend Engineer at Genentech, I spearheaded the redesign of a complex clinical trial data product, migrating a legacy Vue.js application to a modern React and TypeScript architecture. A key part of my responsibility was architecting a reusable design system using React, Radix UI, and Tailwind CSS, which significantly improved developer efficiency and ensured strict adherence to WCAG accessibility standards. I also actively reduced technical debt by writing comprehensive end-to-end tests with Playwright, integrated directly into the CI/CD pipeline via GitHub Actions.

I am highly experienced in co-designing scalable architectures and optimizing performance, which aligns perfectly with your requirements. As a Senior Frontend Developer at Descasio, I collaborated closely with architects to implement a frontend architecture that accelerated development by 30%. I optimized load efficiency by identifying render bottlenecks with React Profiler and reducing bundle size by 30-40% through Webpack bundle analyzer and Rollup plugins, achieving a 35% faster load time. Furthermore, I established automated testing frameworks using Jest and Enzyme, which led to a 20% decrease in bug reports.

My recent work on OurNigeria, a complex web application built as an Nx monorepo managing 6 applications, further demonstrates my ability to integrate REST APIs, manage complex state, and build robust CI/CD pipelines. I am very drawn to eRecht24's pragmatic, product-focused culture and the opportunity to take technical responsibility beyond my own code.

I would welcome the opportunity to discuss how my background in React architecture and performance optimization can contribute to the continued success of eRecht24's platforms.

Thank you for your time and consideration.

Sincerely,

Ogbonna Arinze
