SUMMARY

Senior Frontend Engineer with 8 years of professional experience building and scaling complex, business-critical web applications. Expert in modern JavaScript (ES6+), React, and TypeScript, with a proven track record of designing robust frontend architectures, optimizing performance, and ensuring high code quality. Highly skilled in utility-first CSS frameworks like Tailwind CSS, state management strategies, and REST API integration. Adept at driving technical decisions, conducting rigorous code reviews, and implementing automated testing (Jest, Playwright) and CI/CD pipelines to actively reduce technical debt and deliver exceptional user experiences.

CORE COMPETENCIES

- **Frontend Architecture:** React, TypeScript, JavaScript (ES6+), React Hooks, Component Lifecycles, Micro-frontends.
- **State Management & APIs:** Redux, Zustand, React Query, REST APIs (Axios, Fetch API), GraphQL.
- **UI & Styling:** Tailwind CSS, Radix UI, HTML5, CSS3, Responsive Design, Accessibility (WCAG, a11y).
- **Testing & Quality:** Jest, Enzyme, Playwright, Cypress, ESLint, Prettier, Code Reviews.
- **Build Tools & DevOps:** Webpack, Vite, Rollup, Git, GitHub Actions, CI/CD Pipelines, Docker.
- **Performance Optimization:** Lighthouse, React Profiler, Code Splitting, Lazy Loading, Bundle Analysis.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer (React / TypeScript) — *May 2023 - Present*

- Spearheaded the redesign and scaling of a complex clinical trial data product, migrating a legacy Vue.js application to a modern **React** and **TypeScript** architecture.
- Architected a reusable design system using **React**, **Radix UI**, and **Tailwind CSS**, significantly improving UI consistency, developer efficiency, and strict adherence to **accessibility (WCAG)** standards.
- Optimized application performance by implementing lazy loading, code splitting, and efficient asset delivery, identifying and resolving bottlenecks via **Lighthouse** and Chrome DevTools to ensure fast load times.
- Integrated **RESTful APIs** and managed complex data states using **React Query** for request caching and **Redux** for global state management, refactoring legacy class components to functional components with **React Hooks**.
- Ensured high code quality and actively reduced technical debt by writing comprehensive end-to-end tests with **Playwright**, integrated directly into the **CI/CD pipeline** via GitHub Actions.
- Mentored junior developers through rigorous code reviews, shaping technical decisions and fostering a culture of quality and maintainability.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of intuitive **React** user interfaces, collaborating closely with architects to co-design a scalable frontend architecture that accelerated development by 30% and boosted user engagement by 25%.
- Established automated testing frameworks using **Jest** and **Enzyme**, ensuring high code quality and leading to a 20% decrease in bug reports.
- Optimized frontend performance and load efficiency by identifying render bottlenecks with React Profiler, reducing bundle size by 30-40% through **Webpack** bundle analyzer and Rollup plugins, achieving a 35% faster load time.
- Drove a 40% improvement in React application speed by optimizing state management (using **Redux** and **Zustand**) and caching mechanisms.
- Enforced strict engineering standards for code quality and deployment across the team using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**.

ActivEdge Technologies — Lagos, Nigeria
Senior React Developer — *Oct 2019 - Sep 2021*

- Spearheaded the development of critical modules for a high-volume, business-critical bank Settlement Solution using **React**, **Redux**, and **Axios** for REST API integration, boosting transaction settlement rates by 80%.
- Enhanced system performance and user experience by adopting native browser APIs for real-time data streaming, ensuring a highly responsive interface for complex financial data.
- Built dynamic data visualization dashboards using React, streamlining the management of user roles and permissions.

Founders Lair — Beijing, China (Remote)
Full Stack Engineer (Contract) — *Oct 2020 - Feb 2021*

- Developed **NodeJS RESTful APIs** and translated business requirements into efficient MongoDB database models and schemas.
- Transformed Figma designs into reusable **React** components and engineered a **CI/CD pipeline** for automated deployment to Heroku and AWS.
- Mentored two interns through frontend and backend projects, providing technical guidance and task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed MongoDB database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to NodeJS backend services, developing user use cases, and converting business requirements into database schemas and models.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected a complex, long-term web application as an **Nx monorepo** managing 6 applications, demonstrating expertise in scalable frontend architectures and modern build tools.
- Built the citizen-facing frontend with **React 19** and **Tailwind CSS v4**, featuring 22 interactive chart types, dark mode, and responsive mobile layouts.
- Configured robust **CI/CD** pipelines with GitHub Actions and automated **Playwright** end-to-end tests across web, dashboard, and mobile environments.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
