SUMMARY

Senior Frontend Developer with 8 years of professional experience building high-impact web applications, with solid expertise in Vue.js, React, and modern frontend architectures. Proven track record of improving system performance, enhancing monitoring, and addressing technical debt in complex customer-facing and backoffice applications. Highly skilled in end-to-end development, including automated testing (Playwright, Jest), continuous delivery (GitHub Actions), and performance optimization. Deeply interested and experienced in AI-assisted development tools and integrating LLMs into production workflows, bringing proactive communication and agile methodologies to cross-functional teams.

CORE COMPETENCIES

- **Frontend Frameworks:** Vue.js, React, Next.js, TypeScript, modern JavaScript (ESNext).
- **End-to-End Development:** Automated testing (Playwright, Jest, Cypress), CI/CD pipelines (GitHub Actions), monitoring (Datadog RUM, Sentry, Langfuse).
- **Performance Optimization:** Lighthouse, Chrome DevTools, bundle analysis, lazy loading, caching strategies.
- **AI & LLM Tools:** OpenAI API, LangChain, Vercel AI SDK, Mastra, agentic workflows, prompt engineering.
- **Architecture & Agile:** Agile/Scrum, technical debt resolution, cross-functional collaboration, monorepos.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Maintained and extended the existing **Vue.js** codebase for a complex clinical trial data product, fixing bugs and shipping features for both customer-facing and internal workflows.
- Spearheaded the redesign and migration of the main product from a **Vue.js** web application to a React Chrome extension, collaborating closely with engineers, designers, and product leads.
- Optimized application performance by implementing lazy loading, code splitting, and image optimization, significantly reducing load times and addressing technical debt.
- Used **Lighthouse** and Chrome DevTools to identify and fix performance bottlenecks, improving responsiveness across devices with efficient asset delivery via CDN.
- Increased system reliability by writing automated end-to-end tests with **Playwright** in the **CI/CD pipeline**, publishing test results on GitHub Pages using Allure Reports.
- Co-developed a full-stack chat widget powered by a RAG system using **OpenAI's GPT models**, **LangChain**, and **Vercel AI SDK**, demonstrating strong capability and interest in AI-assisted development tools.
- Mentored a team of two junior developers, fostering a culture of proactive communication, critical thinking, and technical excellence.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of intuitive user interfaces, collaborating closely with software architects to gather user requirements and effectively plan user stories in an **agile development** environment, achieving a 25% boost in user engagement.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks using React Profiler and **Lighthouse** Audits, reducing bundle size by 30-40% and achieving a 35% faster load time.
- Enhanced the development workflow and monitoring by introducing automated testing frameworks, including **Jest** and Enzyme, which led to a 20% decrease in bug reports.
- Established continuous delivery standards for code quality, testing, and deployment across the team using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, accelerating CI/CD processes.
- Drove a 40% improvement in application performance by optimizing caching mechanisms, significantly boosting speed and user experience.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 frontend engineers to build a high-volume bank Settlement Solution, handling thousands to millions of daily transactions and boosting settlement rates by 80%.
- Enhanced system performance and user experience by adopting the native browser EventSource API for real-time data streaming, replacing conventional methods for faster data updates.

- Built dynamic data visualization dashboards, streamlining management of user roles and permissions with Redux Toolkit and Ant Design UI.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed SureEdu, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records, and guardian communications.
- Responsible for full-stack integration, connecting the frontend to NodeJS backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features, and tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected and built an AI-powered platform for budget analysis as an Nx monorepo, managing 6 applications including citizen-facing web apps and admin backoffice dashboards.
- Designed and implemented a multi-agent AI system using the Mastra framework, integrating LLMs for advanced data analysis and intent classification.
- Configured continuous delivery with **GitHub Actions** for automated builds and **Playwright** end-to-end tests across 4 projects (web auth, dashboard auth, desktop Chrome, mobile Pixel 5).
- Integrated Langfuse for LLM observability and monitoring, ensuring high system performance and reliability.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
