SUMMARY

Senior Frontend Engineer with 8 years of professional experience building high-performance Single Page Applications (SPAs) and complex cross-platform web products. Proven expertise in React, state management (Redux, Zustand), and full-stack debugging. Highly product-oriented, combining thoughtfulness with pragmatism to deliver simple, maintainable, and well-tested solutions. Enthusiastic about learning new paradigms, with a strong willingness to master ClojureScript and Re-frame. Adept at collaborating in small, cross-functional teams to bring features from idea to prototype to final implementation.

CORE COMPETENCIES

- **Frontend Architecture:** Single Page Applications (SPAs), React, Next.js, Vue.js, cross-platform applications.
- **State Management:** Redux, Redux Toolkit, Zustand, React Query (eager to learn Re-frame).
- **Languages & Paradigms:** TypeScript, modern JavaScript (ESNext), highly enthusiastic about learning ClojureScript.
- **Full-Stack Debugging:** NodeJS, NestJS, REST APIs, PostgreSQL, Chrome DevTools, Lighthouse, comfortable debugging anywhere in the stack.
- **Testing & Quality:** Playwright, Jest, Cypress, Storybook, CI/CD, ESLint, delivering well-tested solutions.
- **Product & Collaboration:** Cross-functional teamwork, product-minded development, UI/UX implementation, agile workflows.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, optimizing workflows for clinical site integrations.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components to build a simple, maintainable, and high-quality solution.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using **OpenAI GPT models**, demonstrating a strong ability to learn and implement new paradigms rapidly.
- Optimized application performance by implementing lazy loading, code splitting, and efficient asset delivery, significantly reducing load times as measured via **Lighthouse** and Chrome DevTools.
- Increased release reliability by integrating **Playwright** end-to-end tests into the **CI/CD pipeline**, ensuring well-tested solutions and automating reporting with Allure Reports.
- Mentored a team of two junior developers, fostering a culture of technical excellence and cross-functional collaboration.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React Single Page Application (SPA)**, achieving a **25% boost in user engagement** by collaborating closely with software architects and designers.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, combining thoughtfulness with pragmatism to enhance the user experience.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** and achieving a **35% faster load time**.
- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports and ensuring well-tested deliverables.
- Utilized **Storybook** for documenting React components, streamlining change management and supporting agile, cross-functional project management practices.
- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.

ActivEdge Technologies — Lagos, Nigeria
Senior React Developer — *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in a cross-functional team of 3, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) as complex SPAs using **React**, **Redux** for state management, **RxJS**, and **Axios**.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing strategies.

- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Transformed Figma designs into reusable **React** components and engineered a **CI/CD pipeline** for automated deployment to **Heroku** and **AWS**.
- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models, demonstrating comfort with debugging problems anywhere in the stack.
- Mentored two interns through frontend and backend projects, providing technical guidance and task management.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications**, including a **Next.js** citizen-facing web app, **NestJS** API backend, and document ingestion pipeline, demonstrating deep full-stack debugging capabilities.
- Built a multi-agent AI system using **Mastra** with 5 specialized agents, powered by a hybrid RAG pipeline combining **pgvector** and BM25 full-text search with **Cohere** reranking.
- Configured **CI/CD** with **GitHub Actions** for automated builds and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
