## SUMMARY

Senior JavaScript Developer with 8 years of professional experience building high-performance, scalable web applications across healthcare, fintech, and enterprise environments. Proven expertise in architecting modern frontend systems using React and TypeScript, alongside robust backend services in Node.js. Adept at driving engineering excellence through performance optimization, comprehensive testing strategies (Jest, Playwright), and automated CI/CD pipelines. Pragmatic problem-solver with a strong background in component libraries, state management, and integrating AI tools to deliver impactful digital solutions.

## CORE COMPETENCIES

- **Frontend Architecture:** React, TypeScript, Next.js, Vue.js, component libraries, state management (Redux, Zustand, React Query), and performance optimization.
- **Backend & APIs:** Node.js, NestJS, REST APIs, PostgreSQL, MongoDB, JWT authentication, and role-based access control.
- **Testing & Automation:** Playwright (e2e), Jest, Enzyme (unit/integration), Allure Reports, and Storybook.
- **DevOps & Infrastructure:** CI/CD pipelines, GitHub Actions, Docker containerization, Nx monorepos, and AWS.
- **AI Integration:** OpenAI API, LangChain, Vercel AI SDK, Mastra, RAG pipelines, and vector search.
- **Engineering Practices:** Agile methodologies, technical architecture reviews, mentorship, code quality standards (ESLint, Prettier, Husky), and pragmatic problem-solving.

## WORK EXPERIENCE

**Genentech (Roche)** — San Francisco, CA (Remote)
***Frontend Engineer*** — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, optimizing workflows for clinical site integrations.
- Architected a reusable component library and design system in **React** and Radix UI, improving UI consistency, accessibility, and developer efficiency across products.
- Optimized application performance by implementing lazy loading, code splitting, and image optimization, significantly reducing load times as measured by Lighthouse and Chrome DevTools.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy React code from class components to functional components to improve developer experience.
- Implemented authentication and authorization workflows on the frontend using JWT-based flows, securely handling access and refresh tokens with HTTP-only cookies.
- Increased stakeholder confidence by writing end-to-end tests with **Playwright** in the **CI/CD pipeline**, publishing test results on GitHub Pages using the Allure Reports plugin.
- Co-developed a full-stack Next.js chat widget powered by a Retrieval-Augmented Generation (RAG) system using OpenAI's GPT models, LangChain, and Vercel AI SDK, enabling users to query data via a conversational interface.
- Mentored a team of two junior developers, fostering a culture of technical excellence and clear communication of complex technical ideas.

**Descasio** — Lagos, Nigeria (Hybrid)
***Senior Frontend Developer*** — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive user interface using **React**, achieving a 25% boost in user engagement. Collaborated closely with software architects to create a scalable frontend architecture.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks using React Profiler and Lighthouse Audits, reducing bundle size by 30-40% and achieving a 35% faster load time.
- Drove a 40% improvement in React application performance by optimizing caching mechanisms, significantly boosting speed and user experience.
- Enhanced the development workflow by introducing automated testing frameworks, including **Jest** and **Enzyme**, which led to a 20% decrease in bug reports.
- Established engineering standards for code quality, testing, and deployment across the team using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**, accelerating **CI/CD** processes.
- Utilized Storybook for documenting React components, streamlining change management and ensuring clear communication of development processes.

**Founders Lair** — Beijing, China (Remote)
***Full Stack Engineer (Contract)*** — *Oct 2020 - Feb 2021*

- Developed **Node.js** RESTful APIs to power new features, focusing on testable, maintainable, and well-documented code.

- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments on Heroku and production servers on AWS.
- Translated business requirements into efficient database models and schemas, collaborating closely with the business team.

**ActivEdge Technologies** Lagos, Nigeria
***Senior React Developer*** *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 frontend engineers to build a high-volume bank Settlement Solution, boosting transaction settlement rates by 80%.
- Spearheaded the development of critical modules using **React** with Redux for state management, RxJS for data streaming, and Axios for asynchronous API requests.
- Enhanced system performance and user experience by adopting the native browser EventSource API for real-time data streaming.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by 60%.

**SureTrade Business Solutions** Nigeria
***Frontend Developer*** *Mar 2018 - Oct 2019*

- Designed MongoDB database schemas and implemented them in **Node.js** for multiple applications.
- Responsible for server-side web application logic as well as integration of the frontend.
- Worked with a team of 5 to develop SureEdu, a school management portal for school owners to manage staff, students, and guardians.

## PROJECTS

**OurNigeria** ournigeria.ng
***Senior Engineer*** *Feb 2026 - Present*

*AI-powered platform for Nigerian budget analysis and corruption tracking.*

- Architected and built the entire platform as an Nx monorepo managing 6 applications, including a **Node.js (NestJS)** API backend, Next.js web app, and document ingestion pipeline.
- Designed and implemented a multi-agent AI system using the Mastra framework with 5 specialized agents for domain-specific RAG-powered analysis.
- Configured **CI/CD** with GitHub Actions for automated builds, Playwright end-to-end tests, and **Docker** Compose production deployment with multi-stage Dockerfiles and health checks.
- Built the Next.js citizen-facing frontend with React 19 and Tailwind CSS, featuring 22 interactive chart types auto-generated from AI responses.

## EDUCATION

**University of Nigeria** Nsukka, Enugu
*BSc Computer Science, 4.1 CGPA* *Graduation Date: Sep 2019*
