SUMMARY

Senior Frontend Engineer with 8+ years of experience building high-performance, scalable eCommerce and B2B web applications using React.js, TypeScript, and Next.js. Proven expertise in delivering feature-rich booking and marketplace platforms that serve millions of users, with deep experience in frontend architecture, automated testing with Cypress and Playwright, and cloud deployments on GCP and AWS. Passionate about driving product quality, mentoring engineering teams, and shipping reliable solutions in fast-paced, remote-first environments.

CORE COMPETENCIES

- **Frontend Architecture:** Scalable React.js component systems, design systems, monorepos, SSR/SSG/ISR strategies, and micro-frontends.
- **Programming Languages:** TypeScript (4+ years), modern JavaScript (ESNext), NodeJS, Python, and PHP.
- **Frameworks & Tools:** React.js, Next.js, Vue.js, Redux, Tailwind CSS, Storybook, and Webpack/Vite/Rollup for custom build pipelines.
- **Testing & Quality:** Cypress end-to-end testing, Playwright, Jest, visual regression testing, CI-driven QA, and feature flags.
- **Cloud & Infrastructure:** GCP, AWS (CloudFront/S3), Vercel, Docker, edge rendering, and CI/CD automation via GitHub Actions.
- **eCommerce & Marketplace:** Online booking engines, B2B platforms, customer journey optimization, and conversion-driven UI.
- **Performance Engineering:** Rendering optimization, code splitting, lazy loading, CDN strategies, Core Web Vitals, and bundle analysis.
- **API & Integration:** GraphQL, REST, real-time APIs, modern auth flows (JWT, OAuth), and client-side security best practices.
- **Leadership & Methodologies:** Technical mentorship, architecture reviews, Agile/Scrum, TDD/BDD, and DevOps culture.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Frontend Software Engineer (ReactJS) — *May 2023 - Present*

- Architected a **reusable design system** in **React.js** and **Radix UI**, establishing a scalable component library that improved UI consistency, accessibility, and developer velocity across multiple product teams.
- Delivered new features and **optimized** application performance in a **React.js** and **TypeScript** SPA by implementing **lazy loading, code splitting, dynamic imports**, and image optimization, reducing load times significantly. Enhanced responsiveness with memoization and efficient **CDN asset delivery**, using Lighthouse and Chrome DevTools to identify and resolve bottlenecks.
- Engineered **JWT-based authentication** and **role-based access control** in a **Next.js** frontend with **TypeScript** and **React Query**, implementing HTTP-only cookies for secure token handling and permission-based UI rendering.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow, eliminating redundant re-renders, and establishing maintainable patterns that accelerated developer onboarding.
- Increased release reliability by integrating **Cypress** and **Playwright end-to-end tests** into the **CI/CD pipeline**, automating test reporting with Allure Reports and configuring real-time Slack notifications for build quality visibility on every push.
- Actively participated in **frontend architecture** initiatives, planning and executing **codebase maintenance** including refactoring legacy Vue.js code into a modern **React.js Chrome extension**, improving workflows and adoption across clinical site integrations.

DESCASIO LTD — Lagos, Nigeria
Staff Frontend Engineer — *May 2021 - Apr 2022*

- **Owned** the core **frontend architecture** for a data-heavy **React.js** dashboard, implementing virtualization and efficient state management with **Redux** to handle large datasets seamlessly while maintaining smooth UI interactions.
- **Optimized** frontend performance by identifying render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by **30%-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time** and smoother runtime experience across devices.
- **Established** engineering standards for code quality, **testing**, and deployment across the team using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- **Mentored** junior engineers and guided **frontend best practices**, fostering a culture of high-quality, maintainable code and consistent design across projects.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
