SUMMARY

Frontend Developer with 8+ years of experience building high-traffic, customer-facing web applications using React, Next.js, TypeScript, and GraphQL. Proven ability to take ambiguous problems and develop strong, scalable solutions that directly impact millions of users, from optimizing onboarding flows and personal dashboards to delivering accessible, performant websites that handle massive traffic. Passionate about using technology to create meaningful customer experiences, with a collaborative, empathetic approach to working across multi-disciplined teams in fast-paced, agile environments.

CORE COMPETENCIES

- **React & Next.js:** 8+ years building production React applications (React 18/19), advanced Next.js patterns including SSR, SSG, ISR, and API routes for high-traffic, SEO-optimized customer-facing websites and web apps.
- **TypeScript & Modern JavaScript:** Deep expertise in TypeScript, ES6+, and modern JavaScript patterns for building type-safe, maintainable, and scalable frontend codebases.
- **GraphQL & Data Fetching:** Production experience with GraphQL APIs, React Query, and efficient client-side data management for complex data flows, caching strategies, and real-time updates.
- **Styling & Component Systems:** Styled Components, SASS, Tailwind CSS, Radix UI, and Storybook for building consistent, reusable design systems and pixel-perfect, responsive interfaces.
- **Testing & Quality:** Jest, React Testing Library, Cypress, Playwright, end-to-end and integration testing strategies, CI-driven QA with automated reporting, and a commitment to clean, testable code.
- **Performance & Accessibility:** Core Web Vitals optimization, lazy loading, code splitting, bundle optimization, CDN strategies, and strong accessibility practices (WCAG, ARIA) for inclusive, high-performance websites.
- **Python & Backend Familiarity:** Working knowledge of Python, REST APIs, and backend integration patterns, enabling effective collaboration with backend teams and full understanding of the data layer.
- **CI/CD & DevOps:** GitHub Actions, Docker, AWS (CloudFront/S3), Vercel, Webpack/Vite build pipelines, and automated deployment workflows for reliable, fast release cycles.
- **Collaboration & Agile Culture:** Empathetic communicator with experience in flat, agile teams, delegating work effectively, mentoring engineers, conducting architecture reviews, and driving engineering excellence across cross-functional teams.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)

Frontend Software Engineer (React/TypeScript) — *May 2023 - Present*

- Architected the **frontend platform** for a mission-critical data application serving thousands of users, designing a **reusable component library** in **React**, **TypeScript**, and **Radix UI** that improved UI consistency, accessibility compliance, and developer velocity across multiple product modules.
- Developed and integrated **new features** for customer-facing private areas and dashboards, collaborating closely with product managers and UX designers to translate complex business requirements into intuitive, user-friendly interfaces that improved engagement and task completion rates.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached **GraphQL** and REST API data, streamlining data flow, eliminating redundant re-renders, and establishing consistent patterns that accelerated developer onboarding across teams.
- Optimized application **performance** for a high-traffic **React** and **TypeScript** SPA by implementing **lazy loading, code splitting**, dynamic imports, and image optimization, reducing initial load times by over 40% and enhancing responsiveness through **memoization** and efficient **CDN asset delivery**.
- Built **accessible, responsive interfaces** that met strong **accessibility guidelines** (WCAG 2.1 AA), leveraging semantic HTML, ARIA attributes, keyboard navigation patterns, and **Storybook** for component documentation, ensuring inclusive experiences across devices and browsers.
- Engineered **JWT-based authentication** and **role-based access control** in a **Next.js** frontend with **TypeScript**, implementing secure HTTP-only cookie token handling and permission-driven UI rendering to protect sensitive user

data and personalize the customer experience.

- Implemented comprehensive **testing strategies** using **Jest**, **React Testing Library**, and **Playwright** end-to-end tests integrated into the **CI/CD pipeline**, automating test reporting with **Allure Reports** and configuring real-time Slack notifications, increasing release confidence and reducing production regressions.
- Championed **frontend best practices** and **Storybook-driven development**, building an interactive component catalogue that served as the single source of truth for UI elements, enabling designers and developers to iterate rapidly on new features while maintaining visual consistency.
- Proactively identified and resolved **performance bottlenecks** using **Lighthouse**, **Chrome DevTools**, and React Profiler, optimizing **Core Web Vitals** scores and implementing performance budgets to ensure the platform remained fast and reliable under high traffic loads.
- Modernized a **legacy Vue.js web application** into a **React-based Chrome extension**, refactoring legacy code while preserving business logic, optimizing user workflows, and enhancing adoption through close collaboration with cross-functional teams across multiple disciplines.

DESCASIO LTD Lagos, Nigeria
Staff Frontend Engineer *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a **data-heavy React dashboard** handling high levels of traffic, implementing **virtualization** and efficient state management to render tens of thousands of data rows with smooth scrolling and responsive interactions across devices.
- Optimized **frontend performance** and load efficiency by profiling render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by **30%-40%** through **webpack-bundle-analyzer** and **rollup-plugin-visualizer**, achieving a **35% faster load time** and smoother runtime experience.
- Built **real-time data update capabilities** using **WebSockets** and efficient DOM reconciliation strategies, ensuring dashboards reflected live data changes without full page reloads, delivering a seamless customer experience with minimal latency.
- Designed and implemented a **scalable component architecture** with clearly defined **TypeScript** interfaces and composition patterns, documented in **Storybook**, enabling teams to rapidly add new dashboard modules and marketing features without modifying the core framework.
- Developed **comprehensive testing strategies** including unit tests with **Jest** and **React Testing Library**, integration tests, and end-to-end tests with **Cypress**, achieving high test coverage that significantly reduced production regressions and accelerated release cycles.
- Built custom **Webpack and Rollup** build configurations with tree shaking, scope hoisting, and chunk splitting strategies, optimizing the application for **high-traffic production environments** with minimal bundle sizes and fast initial page loads.
- Integrated **GraphQL APIs** and collaborated with backend engineers to define efficient data contracts, reducing over-fetching and improving page load performance by delivering precisely the data structures needed for complex dashboard visualizations.
- Styled components using **SASS** and CSS-in-JS approaches, building a consistent, themeable design system that maintained visual coherence across dozens of dashboard views and supported rapid iteration on marketing and customer-facing features.
- Established engineering standards for **code quality** and deployment using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing lint errors by 90% and accelerating **CI/CD** cycle times across the team.
- **Mentored** junior engineers and guided frontend best practices, conducting code reviews focused on **React** performance patterns, **TypeScript** type safety, **accessibility**, and testing discipline, fostering a collaborative culture of high-quality, maintainable code.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
