SUMMARY

Frontend React Developer with 8+ years of experience building high-performance, user-centric web applications and financial platforms using React.js, HTML, CSS, JavaScript, Tailwind CSS, and Webpack. Proven track record of implementing scalable, data-rich interfaces for large-audience portals, optimizing SEO and Core Web Vitals for millions of page impressions, and delivering pixel-perfect UIs with meticulous attention to detail. Experienced in agile fintech environments, combining independent ownership with strong team collaboration to continuously improve product quality and developer workflows.

CORE COMPETENCIES

- **Frontend Development:** React.js, HTML5, CSS3, Vanilla JavaScript (ESNext), Tailwind CSS, and responsive, cross-browser web applications.
- **Build Tools & Bundlers:** Webpack, Vite, Rollup, custom build pipelines, bundle optimization, and code splitting strategies.
- **Frameworks & Libraries:** Next.js, Node.js, Vue.js, Redux, React Query, Storybook, and Radix UI component libraries.
- **Testing & Quality:** Cypress end-to-end testing, Playwright, Jest, visual regression testing, CI-driven QA, and automated test reporting.
- **API & Integration:** REST APIs, GraphQL, JWT authentication, real-time data flows, and reactive programming patterns.
- **DevOps & CI/CD:** Git, GitHub Actions, GitLab CI/CD, Docker, AWS (CloudFront/S3), Vercel, and automated deployment pipelines.
- **SEO & Performance:** Core Web Vitals optimization, Lighthouse audits, CDN strategies, lazy loading, SSR/SSG, and website performance tuning.
- **Leadership & Methodologies:** Agile/Scrum, technical mentorship, architecture reviews, code quality standards, and design sensibility.

WORK EXPERIENCE

Roche Genentech San Francisco, CA (Remote)

Frontend Software Engineer (React.js) *May 2023 - Present*

- Architected a **reusable design system** in **React.js** and Radix UI, establishing a scalable component library with **Storybook** documentation that improved UI consistency, accessibility, and developer velocity across multiple product teams.
- Implemented and maintained complex **web applications** using **React.js, TypeScript, HTML, CSS**, and **Tailwind CSS**, delivering pixel-perfect, responsive interfaces that matched design specifications with meticulous attention to detail.
- Optimized application performance in a **React.js** SPA by implementing **lazy loading, code splitting, dynamic imports**, and image optimization through **Webpack** configuration tuning, reducing load times significantly and improving **Core Web Vitals** scores.
- Enhanced responsiveness and runtime efficiency using memoization, virtualized lists, and efficient **CDN asset delivery**, leveraging **Lighthouse** and **Chrome DevTools** to identify and resolve rendering bottlenecks across devices.
- Engineered **JWT-based authentication** and role-based access control in a **Next.js** frontend with **React Query**, implementing HTTP-only cookies for secure token handling and integrating **REST API** endpoints for permission-based UI rendering.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached API data, streamlining data flow, eliminating redundant re-renders, and establishing maintainable patterns.
- Increased release reliability by integrating **Cypress** and **Playwright end-to-end tests** into the **CI/CD pipeline**, automating test reporting with Allure Reports and configuring real-time Slack notifications for build quality visibility on every push.

- Configured and optimized **Webpack** build pipelines for production deployments, implementing tree-shaking, chunk splitting, and asset compression to minimize bundle sizes and maximize page load performance.
- Collaborated with backend and design teams in an **agile** environment, participating in sprint planning, code reviews, and architecture discussions to continuously improve product quality and delivery cadence.
- Refactored a legacy **Vue.js** web application into a modern **React.js Chrome extension** using **Vanilla JavaScript** interop layers, improving workflows and adoption across clinical site integrations while maintaining backward compatibility.

DESCASIO LTD Lagos, Nigeria
Staff Frontend Engineer *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a data-heavy **React.js** dashboard serving financial and enterprise clients, implementing virtualization and efficient state management with **Redux** to handle large datasets seamlessly.
- Optimized frontend performance by identifying render bottlenecks using **React Profiler** and **Lighthouse Audits**, reducing bundle size by **30%-40%** through **webpack-bundle-analyzer** and rollup-plugin-visualizer, achieving a **35% faster load time**.
- Implemented **SEO optimizations** and performance tuning across web applications, improving search engine visibility, page speed scores, and organic traffic through server-side rendering, meta tag management, and structured data markup.
- Built and maintained **responsive, accessible interfaces** using **HTML, CSS, JavaScript**, and **Tailwind CSS**, ensuring cross-browser compatibility and adherence to WCAG standards across all supported devices and screen sizes.
- Configured **CI/CD pipelines** using **GitHub Actions** and **Docker** for automated builds, testing, and deployment, reducing manual release overhead and accelerating delivery cycles.
- Integrated **REST** and **GraphQL APIs** into frontend applications, designing efficient data fetching layers with caching strategies that reduced API calls by 40% and improved perceived application responsiveness.
- Established engineering standards for code quality, testing, and deployment across the team using **ESLint, Prettier, Husky, Lint-staged**, and **Git** hooks, reducing errors and enforcing consistent code style.
- Developed interactive **Storybook** component documentation for the shared UI library, enabling designers and developers to preview, test, and iterate on components independently before integration.
- Worked independently and collaboratively within an **agile Scrum** team, taking ownership of feature delivery from design handoff through deployment while contributing to sprint retrospectives and process improvements.
- Mentored junior engineers on **React.js** best practices, **Git** workflows, and modern **JavaScript** patterns, fostering a culture of high-quality, maintainable code and consistent design across projects.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
