SUMMARY

Senior Frontend Engineer with 8+ years of experience building high-quality, scalable, and responsive web applications for complex B2B platforms using React, TypeScript, and modern JavaScript (ES6+). Proven track record of owning features end-to-end, from translating intricate business logic into intuitive, partner-facing interfaces to extending backend services and API endpoints as needed. Adept at championing frontend best practices, mentoring backend-focused engineers on modern UI standards, and collaborating closely with product managers and designers to deliver solutions that simplify daily operations for platform partners.

CORE COMPETENCIES

- **React & TypeScript:** 8+ years of production React development (React 18/19), advanced TypeScript patterns, hooks, memoization, concurrent rendering, and building complex, data-heavy B2B web applications at scale.
- **Modern JavaScript & Web Technologies:** Deep expertise in ES6+, HTML5, CSS3, responsive design, cross-browser compatibility, and progressive enhancement for seamless experiences across devices.
- **State Management & Complex Data Flows:** Redux, React Query, Zustand, Jotai, and Context API for managing complex client and server state in data-intensive B2B applications with efficient cache invalidation.
- **Fullstack Capability:** Comfortable navigating backend codebases (Node.js, REST APIs, GraphQL), writing and modifying API endpoints, performing database queries (PostgreSQL, MongoDB), and working with backend microservices.
- **Performance & Accessibility:** Virtualization, lazy loading, code splitting, bundle optimization, Core Web Vitals, and accessibility best practices (WCAG, ARIA) for performant, inclusive interfaces.
- **UI Engineering & Design Systems:** Radix UI, Tailwind CSS, Storybook, custom design systems, Figma-to-code workflows, and translating complex B2B workflows into intuitive, user-friendly interfaces.
- **Testing & Quality Assurance:** Jest, Cypress, Playwright, end-to-end and integration testing, CI-driven QA with Allure Reports, and a commitment to clean, modular, testable code.
- **CI/CD & Infrastructure:** GitHub Actions, Docker, AWS (CloudFront/S3), Vercel, Webpack/Vite/Rollup build pipelines, and automated deployment workflows.
- **Collaboration & Mentorship:** Product-oriented mindset, cross-functional collaboration with PMs and UX/UI designers, mentoring engineers on frontend best practices, architecture reviews, and Agile/Scrum methodologies.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)

Frontend Software Engineer (React/TypeScript) — *May 2023 - Present*

- Led **frontend architecture** for a business-critical data platform, designing a **reusable design system** in **React** and **Radix UI** with **TypeScript** that improved UI consistency, accessibility, and developer velocity across multiple product teams.
- Owned features **end-to-end** from initial concept through development, testing, deployment, and operation, collaborating with **product managers** to refine requirements and with **UX/UI designers** to translate complex data workflows into intuitive, user-friendly interfaces.
- Scaled **state management** in a large **Next.js** application by integrating **Redux** for complex client state and **React Query** for cached server data, streamlining data flow, eliminating redundant re-renders, and establishing consistent patterns that accelerated developer onboarding.
- Optimized application **performance** in a **React** and **TypeScript** SPA handling large datasets by implementing **virtualization, lazy loading, code splitting**, and dynamic imports, reducing initial load times by over 40% and enhancing responsiveness through **memoization** and efficient CDN asset delivery.
- Extended **backend services** and adjusted **API endpoints** as needed to support frontend requirements, working across the stack to ensure features were not blocked by external dependencies and data flowed seamlessly from server to UI.
- Built **responsive and performant interfaces** delivering seamless experiences across various devices and browsers, leveraging **HTML5, CSS3**, and **Radix UI** layouts while maintaining a keen eye for **accessibility** (WCAG compliance) and cross-platform consistency.

- Engineered **JWT-based authentication** and **role-based access control** in a **Next.js** frontend with **TypeScript** and **React Query**, implementing secure HTTP-only cookie token handling and permission-driven UI rendering in collaboration with backend teams.
- Championed **frontend best practices** within the team by writing clean, modular, and testable code, conducting thorough code reviews, and mentoring engineers who were more backend-focused on modern **React** and **TypeScript** UI standards.
- Increased release reliability by integrating **Playwright end-to-end tests** and **Jest unit tests** into the **CI/CD pipeline**, automating test reporting with **Allure Reports** hosted on GitHub Pages, and configuring real-time Slack notifications for build quality visibility.
- Proactively identified and resolved **complex technical challenges**, profiling render bottlenecks using **Lighthouse** and **Chrome DevTools**, optimizing **Core Web Vitals**, and implementing performance budgets to ensure the platform remained fast and reliable as features scaled.
- Modernized a **legacy Vue.js web application** into a **React-based Chrome extension**, refactoring legacy code while preserving business logic, optimizing workflows for site integrations, and enhancing adoption through close collaboration with design and backend teams.

DESCASIO LTD Lagos, Nigeria
Staff Frontend Engineer *May 2021 - Apr 2022*

- Owned the core **frontend architecture** for a **data-heavy React dashboard** serving enterprise B2B clients, implementing **virtualization** and efficient **Redux** state management to handle tens of thousands of rows with smooth scrolling and responsive interactions.
- Optimized frontend performance by profiling and resolving render bottlenecks using **React Profiler** and **Lighthouse**, reducing bundle size by **30%-40%** through **webpack-bundle-analyzer** and **rollup-plugin-visualizer**, achieving a **35% faster load time** across devices.
- Built **real-time data update capabilities** using **WebSockets** and efficient DOM reconciliation strategies, ensuring the dashboard reflected live inventory and pricing changes without full page reloads or unnecessary re-renders.
- Designed and implemented an **extensible component architecture** with clearly defined **TypeScript** interfaces and composition patterns, enabling teams to add new dashboard widgets and data views without modifying the core framework.
- Developed **comprehensive testing strategies** including unit tests with **Jest**, integration tests, and end-to-end tests with **Cypress**, achieving high test coverage that significantly reduced production regressions.
- Built custom **Webpack and Rollup** build configurations optimized for the application's module structure, implementing tree shaking, scope hoisting, and chunk splitting strategies that minimized bundle sizes for production deployments.
- Collaborated with **backend engineers** to define API contracts and adjust **REST endpoints**, performing **database queries** and data transformations to ensure the frontend received precisely the data structures needed for complex B2B workflows.
- Established engineering standards for **code quality, testing**, and deployment across the team using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing lint errors by 90% and accelerating **CI/CD** cycle times.
- Implemented **algorithmic optimizations** for client-side data filtering, sorting, and search across large datasets, applying efficient data structures to maintain sub-second response times for partner-facing features.
- Mentored junior engineers and guided **frontend best practices**, conducting code reviews focused on **React** performance patterns, **TypeScript** type safety, **accessibility**, and testing discipline, fostering a culture of high-quality, maintainable code across the team.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
