SUMMARY

Full-Stack Developer with 6+ years of experience building modern, responsive web applications using React, Next.js, TypeScript, and Node.js. Proven expertise in optimizing performance, load times, and usability for web and mobile platforms while integrating AI-powered features and recommendation systems. Experienced in API design, database integration, and expanding automated testing and CI/CD pipelines within cross-functional product teams.

CORE COMPETENCIES

- **Frontend Development:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, responsive design, and UI/UX principles.
- **AI & LLM Integration:** Generative AI, LangChain, Vercel AI SDK, prompt engineering, RAG strategies, and LLM-powered web features.
- **Backend & APIs:** Node.js, Python, PHP, REST, GraphQL, API design, database integration, and server-side rendering.
- **Performance Engineering:** Code splitting, lazy loading, CDN strategies, Core Web Vitals optimization, Lighthouse profiling, and bundle analysis.
- **Testing & CI/CD:** Jest, Cypress, Playwright, automated testing pipelines, GitHub Actions, and continuous monitoring.
- **Cloud & Infrastructure:** AWS (CloudFront, S3), Vercel, Docker, and CI/CD automation.
- **Databases:** PostgreSQL, MongoDB, Redis, Prisma ORM, and data-driven feature development.
- **Collaboration:** Product management partnerships, UX team collaboration, Agile/Scrum, architecture reviews, and mentorship.

WORK EXPERIENCE

Roche Genentech — San Francisco, CA (Remote)
Full-Stack Developer (React, Next.js) — *May 2023 - Present*

- Implemented features across the **full technology stack** with emphasis on modern **Next.js** frontends, building responsive UI components using **HTML, CSS, and TypeScript** for a clinical trial data platform serving thousands of users.
- Architected a **reusable design system** in **React** and **Radix UI**, establishing scalable component patterns that improved UI consistency, **responsive design**, and developer velocity across multiple product teams.
- Integrated **AI-powered features** into web applications using **LLM APIs** and **prompt engineering**, enabling intelligent data recommendations and personalized user experiences within the clinical platform.
- Connected frontend interfaces with backend services, **databases**, and **API endpoints** using **GraphQL** and **REST**, designing efficient data contracts and ensuring type-safe integration patterns.
- Optimized **performance, load times, and usability** for web and mobile platforms through lazy loading, code splitting, dynamic imports, and image optimization, measured via **Lighthouse** and **Chrome DevTools**.
- Engineered **JWT-based authentication** and **role-based access control** in **Next.js** with **TypeScript** and **React Query**, implementing secure token handling and permission-based UI rendering.
- Scaled **state management** in a large **Next.js** application using **Redux** for client state and **React Query** for cached API data, cutting redundant re-renders and accelerating developer onboarding.
- Collaborated with **product management, UX, and backend teams** on application architecture decisions, contributing to roadmap strategy and feature prioritization based on user impact.
- Expanded **automated testing** and **CI/CD pipelines** by integrating **Playwright** and **Cypress** end-to-end tests, automating reporting with Allure and configuring Slack notifications for build quality monitoring.
- Researched and integrated **emerging technologies** including generative AI tools and development workflow enhancements, improving team productivity and application capabilities.

DESCASIO LTD — Lagos, Nigeria
Staff Full-Stack Developer — *May 2021 - Apr 2022*

- **Owned** the core frontend architecture for a data-heavy **React** dashboard, implementing virtualization and efficient state management with **Redux** to handle large datasets with smooth UI interactions.

- Built **responsive UI components** using modern **CSS** methodologies, ensuring cross-device compatibility and optimized rendering for both web and mobile viewports.
- Integrated frontend with **backend APIs** and **database services**, designing efficient data fetching patterns and ensuring seamless user workflows across the application stack.
- Optimized frontend performance using **React Profiler** and **Lighthouse**, reducing bundle size by **30%-40%** through webpack-bundle-analyzer, achieving a **35% faster load time** across devices.
- Developed **automated testing suites** using **Jest** and **Cypress**, expanding test coverage and establishing CI/CD quality gates that caught regressions before production deployments.
- Connected backend services and **databases** to power personalized features, implementing efficient query patterns and caching strategies for improved application responsiveness.
- Established engineering standards for **code quality** and deployment using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, accelerating CI/CD processes.
- Built reusable **React component libraries** with **Storybook** documentation, ensuring consistent design patterns and accelerating feature development across the team.
- Collaborated with **product management** and UX teams on application architecture, providing technical input on feature feasibility and user experience improvements.
- **Mentored** junior engineers on frontend and fullstack best practices, fostering a quality-conscious, hands-on engineering culture across projects.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
