SUMMARY

Web Frontend Engineer with 8 years building production interfaces in **JavaScript**, **TypeScript**, modern **CSS**, and **React**. Architect of a reusable React and Radix UI design system at Genentech with a focus on accessibility (WCAG/ARIA), performance, and consistency across products. Comfortable with deep async, written-first collaboration after years of fully distributed teams across San Francisco, Lagos, Beijing, and Berlin. Strong fundamentals in HTTP, browser internals, and performance profiling, alongside backend exposure across NestJS and NodeJS for context-aware fullstack work.

CORE COMPETENCIES

- **Core Web:** JavaScript (ESNext), TypeScript, semantic HTML, modern CSS (Flexbox, Grid, custom properties), responsive layouts, progressive enhancement.
- **Frameworks:** React, Next.js, Vue.js (legacy maintenance and migration), with strong fundamentals over framework reliance.
- **Design Systems and UI:** Radix UI, Tailwind CSS, Ant Design, custom React component libraries, Storybook documentation, Figma-to-code workflows.
- **Accessibility:** WCAG and ARIA compliance, keyboard-first interactions, semantic markup, color contrast and screen-reader testing.
- **Performance:** Lighthouse and Core Web Vitals tuning, code splitting, lazy loading, bundle analysis (webpack-bundle-analyzer, rollup-plugin-visualizer), memoization.
- **Tooling and DevOps:** Vite, Webpack, Rollup, pnpm and Nx monorepos, GitHub Actions CI/CD, Playwright E2E.
- **Async Communication:** 8 years of remote-first work, written-first collaboration, technical writing for design docs, RFCs, and code review.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)

Frontend Engineer — *May 2023 - Present*

- Architected a reusable design system in **React** and **Radix UI** with **Tailwind CSS**, raising UI consistency, **accessibility** (WCAG/ARIA), and developer velocity across multiple product teams.
- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension with **TypeScript**, owning the rebuild end-to-end across architecture, UI, and delivery.
- Maintained the existing **Vue.js** codebase in parallel with the React rebuild, fixing bugs and shipping features without regressions across the migration window.
- Optimized application performance through lazy loading, code splitting, image optimization, memoization to minimize re-renders, and CDN asset delivery, profiling concrete bottlenecks with **Lighthouse** and Chrome DevTools.
- Implemented **JWT-based authentication** and role-based access control on the frontend with HTTP-only cookies, protected client-side routes, permission-gated UI, and seamless token refresh, collaborating with backend engineers on the auth contract.
- Introduced **Redux** for client state and **React Query** for server-state caching and request deduplication, refactoring legacy class components to functional components.
- Co-developed a full-stack **Next.js** chat widget powered by a Retrieval-Augmented Generation (RAG) system using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma vector database.
- Integrated **Playwright** end-to-end tests in a **GitHub Actions** CI/CD pipeline, published **Allure Reports** on GitHub Pages, and pushed Slack notifications with deep links to test results on every push.
- Mentored two junior developers (interns) through a written-first review process, fostering a culture of clarity and craft.

Descasio — Lagos, Nigeria (Hybrid)

Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of a greenfield **React** + **TypeScript** interface for a cloud platform, achieving a **25% boost in user engagement** and partnering with architects on a scalable frontend that accelerated delivery by **30%**.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, cut bundle size **30-40%** via rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster** initial load.
- Drove a **40% improvement** in runtime performance by reworking caching strategies across the React application.
- Documented React components with **Storybook**, streamlining change management and clear cross-team communication on UI behavior.
- Introduced **Jest** and **Enzyme** testing frameworks, leading to a **20% drop** in bug reports.
- Established team engineering standards via **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD.

- Mentored junior engineers on frontend best practices and accessible markup.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in a team of 3, handling thousands to millions of transactions daily and boosting settlement rates by **80%**.
- Developed payment modules (MasterCard, VISA, Express-cash, E-commerce) with **React**, **Redux**, **RxJS**, and **Axios**.
- Adopted the native **EventSource API** in place of socket.io for real-time data streaming, improving UI latency and reducing dependency surface.
- Built a real-time account reconciliation tool, lifting daily reconciliation by **60%**.
- Built dynamic data visualization dashboards with **react-chartjs**, **Redux Toolkit**, and **Ant Design**.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Converted user journeys and Figma designs into reusable **React** components for a consistent UI.
- Developed **NodeJS** RESTful APIs for new features, focused on testable, maintainable, well-documented code.
- Engineered a CI/CD pipeline for automated API deployment to Heroku and AWS production servers.
- Mentored two interns through structured frontend and backend project work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Built **SureEdu**, a school management portal, in a team of 5, owning frontend interfaces in semantic **HTML**, **CSS**, and **JavaScript**.
- Designed **MongoDB** schemas and implemented server-side logic in **NodeJS**, building and testing REST endpoints for guardian, staff, and student modules.
- Authored use cases, translated them into database models, and wrote feature documentation per application.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget transparency platform. Multi-agent LLM pipeline analyzing 700+ budget documents (708K+ vector embeddings) across 37 states.

- Built three **Next.js** frontends (citizen-facing web, admin dashboard, marketing landing) with **React 19**, **TypeScript**, and **Tailwind CSS v4** in an **Nx** + **pnpm** monorepo.
- Implemented responsive mobile-first layouts, dark mode, URL state via nuqs, and **Recharts** visualizations auto-generated from AI responses (22 chart types).
- Built shareable public conversation pages with SSR, Open Graph metadata, JSON-LD FAQPage schema, and slug-based URLs for SEO and Core Web Vitals.
- Configured CI/CD with **GitHub Actions**, **Playwright** E2E across 4 projects (web auth, dashboard auth, desktop, mobile Pixel 5), and Docker Compose production deployment.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
