SUMMARY

Senior Fullstack TypeScript Engineer with 8 years building B2B SaaS products where the bulk of the complexity sits on the frontend. Led a Vue.js to React migration at Genentech end-to-end, architected a Radix UI design system, and built a Next.js RAG chat widget alongside a NestJS multi-agent platform at OurNigeria. Deep **React** + **Node.js** + **TypeScript** craft, autonomous delivery, and a track record of mentoring fellow developers and writing technical training material. Comfortable owning multiple projects in parallel for an autonomous, profitability-focused team.

CORE COMPETENCIES

- **Frontend (deep):** React, Next.js, TypeScript, Redux, React Query, Zustand, Tailwind CSS, Radix UI, Storybook, complex SPA architecture.
- **Backend:** NestJS, Node.js, REST APIs, GraphQL, JWT auth, RBAC, SSE streaming, webhooks.
- **Migrations and Refactoring:** Vue.js to React migration at Greentech-scale, class to functional component refactor, legacy codebase cleanup, build pipeline modernization.
- **Performance:** Lighthouse, Core Web Vitals, code splitting, bundle analysis (rollup-plugin-visualizer, webpack-bundle-analyzer), React Profiler, memoization.
- **Testing:** Playwright (E2E in CI), Jest, Enzyme, Cypress, Storybook, Allure Reports.
- **Tooling and DevOps:** Vite, Webpack, Rollup, Nx and pnpm monorepos, Docker, GitHub Actions, AWS, Vercel.
- **Mentorship and Training:** Mentored interns and juniors at Genentech, Founders Lair, and Descasio; established team standards and ran code-review culture.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, leading a **Vue.js to React** migration to a Chrome extension with **TypeScript**, owning architecture and rollout across product, design, and engineering.
- Maintained the existing **Vue.js** codebase in parallel with the React rebuild, fixing bugs and shipping features without regression - the same migration shape lemlist's React migration is in.
- Co-developed a full-stack **Next.js** chat widget powered by RAG (OpenAI, LangChain, Vercel AI SDK, Chroma), embeddable on external sites with streaming UX.
- Architected a reusable design system in **React** and **Radix UI** with **Tailwind CSS**, raising UI consistency, accessibility (WCAG/ARIA), and developer velocity.
- Introduced **Redux** for client state and **React Query** for server-state caching and request deduplication, refactored class components to functional, tuned the build pipeline.
- Implemented **JWT-based authentication** and role-based access control on the frontend with HTTP-only cookies, protected routes, and seamless token refresh.
- Optimized application performance through lazy loading, code splitting, image optimization, memoization, and CDN delivery, profiled with **Lighthouse** and Chrome DevTools.
- Integrated **Playwright** E2E into **GitHub Actions** CI/CD with **Allure Reports** on GitHub Pages and Slack notifications on every push.
- Mentored two junior developers (interns), running training sessions and written-first reviews, fostering a culture of technical excellence.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of a greenfield **React** + **TypeScript** cloud console interface, achieving a **25% boost in user engagement** and accelerating delivery by **30%** through a scalable frontend architecture.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, cut bundle size **30-40%** via rollup-plugin-visualizer and webpack-bundle-analyzer, achieving **35% faster** initial load.
- Drove a **40% improvement** in runtime performance by reworking caching strategies across the React application.
- Documented React components with **Storybook**, streamlining change management and supporting agile delivery with precise user-story planning.
- Introduced **Jest** and **Enzyme** testing frameworks, leading to a **20% drop** in bug reports.
- Established team engineering standards via **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD.

- Mentored junior engineers on frontend best practices, ran weekly knowledge-sharing sessions, and reviewed PRs with a teaching mindset.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in a team of 3, handling thousands to millions of transactions daily and boosting settlement rates by **80%**.
- Developed payment modules (MasterCard, VISA, Express-cash, E-commerce) with **React**, **Redux**, **RxJS** for streamed data flows, and **Axios** for asynchronous APIs.
- Built a real-time account reconciliation tool, lifting daily reconciliation by **60%**.
- Adopted the native **EventSource API** for real-time streaming over socket.io, improving latency.
- Built dashboards with **react-chartjs**, **Redux Toolkit**, and **Ant Design**.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs with **MongoDB** data models translated from business requirements.
- Converted Figma designs into reusable **React** components for a consistent UI.
- Engineered a CI/CD pipeline for automated API deployment to Heroku and AWS production servers.
- Mentored two interns through structured frontend and backend project work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Built **SureEdu**, a school management portal, in a team of 5: staff payroll/attendance, student records, guardian portals.
- Designed **MongoDB** schemas and implemented server-side **NodeJS** logic with REST endpoints.
- Authored use cases, translated them into database models, and wrote feature documentation per application.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget transparency platform. NestJS + Next.js fullstack TypeScript with multi-agent LLM pipeline over 700+ documents and 708K+ vector embeddings.

- Architected the platform as an **Nx monorepo** of 6 apps: **NestJS** API, **NestJS** ingestion pipeline, three **Next.js** apps, and a Remotion video service, orchestrated with **pnpm**.
- Built a multi-agent AI system on Mastra (Router + 4 domain analysts) with three-stage intent classification and SSE-streamed chat responses.
- Built the **Next.js** citizen-facing frontend with **React 19**, **TypeScript**, **Tailwind CSS v4**, dark mode, URL state via nuqs, and 22 interactive Recharts visualizations auto-generated from AI responses.
- Configured CI/CD with **GitHub Actions**, **Playwright** E2E across 4 projects, and Docker Compose production deployment.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
