SUMMARY

Frontend Engineer with 8 years building delightful, opinionated UIs for data-heavy products. Has shipped **22 interactive chart types** auto-generated from AI responses at OurNigeria, real-time settlement dashboards on **react-chartjs** at ActivEdge, and a complex clinical trials interface at Genentech (Roche). Strong product sensibility: cares about copy, micro-interactions, and the details that make data exploration feel fast. Experienced on large, complex **React + Redux** codebases, with strong CSS, design-system, and component-library work. Async-first writer with 6 years of fully distributed remote collaboration.

CORE COMPETENCIES

- **Core Stack:** React, JavaScript (ESNext), TypeScript, Redux, Redux Toolkit, React Query, modern CSS (Flexbox, Grid, custom properties), Tailwind CSS.
- **Data Visualization:** Recharts (22 chart types in production), react-chartjs (settlement dashboards), interactive filtering, annotations, and data point exposure across dashboards.
- **Design Systems and Component Libraries:** Architected a Radix UI design system at Genentech with WCAG/ARIA compliance; documented components with Storybook; Ant Design experience.
- **Performance:** Lighthouse, Core Web Vitals, code splitting, lazy loading, React Profiler, memoization to minimize re-renders, bundle analysis.
- **Testing and Quality:** Playwright (E2E in CI with Allure on GitHub Pages), Jest, Enzyme, Cypress, Storybook, written-first code review.
- **Async Communication:** 6 years remote-first across San Francisco, Lagos, Beijing, and Berlin; comfortable writing thoughtful proposals and design docs.
- **CS Fundamentals:** Data structures, performance, structure manipulation, applied across high-throughput settlement and reconciliation work.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Architected a reusable design system in **React** and **Radix UI** with **Tailwind CSS**, raising UI consistency, accessibility (WCAG/ARIA), and developer velocity across multiple product teams.
- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** SPA to a **React** Chrome extension with **TypeScript**, owning the UI rebuild end-to-end.
- Introduced **Redux** for client state and **React Query** for server-state caching and request deduplication, refactored class components to functional, tuned the build pipeline.
- Optimized application performance through lazy loading, code splitting, image optimization, memoization, and CDN delivery, profiled with **Lighthouse** and Chrome DevTools to fix concrete bottlenecks.
- Co-developed a full-stack **Next.js** chat widget powered by RAG (OpenAI, LangChain, Vercel AI SDK, Chroma) with delightful streaming UX and embeddable on external sites.
- Implemented **JWT-based** auth and RBAC on the frontend with HTTP-only cookies, protected routes, and seamless token refresh.
- Integrated **Playwright** E2E into **GitHub Actions** CI/CD with **Allure Reports** on GitHub Pages and Slack notifications, raising release confidence.
- Maintained the existing **Vue.js** codebase in parallel with the React rebuild, fixing bugs and shipping features without regression.
- Mentored two junior developers (interns) through written-first reviews and pair programming.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of a greenfield **React** + **TypeScript** cloud console interface, achieving a **25% boost in user engagement** through careful UX iteration and accelerating delivery by **30%**.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, cut bundle size **30-40%** via rollup-plugin-visualizer and webpack-bundle-analyzer, achieving **35% faster** initial load.
- Drove a **40% improvement** in runtime performance by reworking caching strategies across the React application.
- Documented React components with **Storybook**, streamlining change management and clear cross-team communication on UI behavior.
- Introduced **Jest** and **Enzyme** testing frameworks, leading to a **20% drop** in bug reports.
- Established team engineering standards via **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**.

- Mentored junior engineers on frontend best practices and accessible markup.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built dynamic **data visualization dashboards** using **React** and **react-chartjs**, streamlining management of user roles and permissions with **Redux Toolkit** and **Ant Design** for a high-throughput settlement environment.
- Built a high-volume bank Settlement Solution in a team of 3, handling thousands to millions of transactions daily and boosting settlement rates by **80%**.
- Developed payment modules (MasterCard, VISA, Express-cash, E-commerce) with **React**, **Redux**, **RxJS**, and **Axios**, managing complex async data flows.
- Built a real-time account reconciliation tool, lifting daily reconciliation by **60%**.
- Adopted the native **EventSource API** for real-time data streaming over socket.io, improving latency.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Converted user journeys and Figma designs into reusable **React** components for a consistent UI.
- Developed **NodeJS** RESTful APIs with testable, maintainable, well-documented code.
- Engineered a CI/CD pipeline for automated API deployment to Heroku and AWS production servers.
- Mentored two interns through structured frontend and backend project work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Built **SureEdu**, a school management portal, in a team of 5: staff payroll/attendance, student records, guardian portals.
- Designed **MongoDB** schemas and implemented server-side **NodeJS** logic with REST endpoints.
- Authored use cases, translated them into database models, and wrote feature documentation per application.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget transparency platform. Citizens query 700+ budget documents (708K+ vector embeddings) across 37 states in plain English or Pidgin and get back interactive charts.

- Built the **Next.js** citizen-facing frontend with **React 19**, **TypeScript**, **Tailwind CSS v4**, and **22 interactive chart types** in **Recharts**, auto-generated from structured AI responses with annotations, comparison views, and drill-downs.
- Implemented dark mode, URL state management with nuqs for shareable filtered views, and responsive mobile layouts.
- Implemented **SSE streaming** for real-time chat responses with keepalive heartbeats, token-budgeted context windows, conversation summarization, and memory extraction.
- Built shareable public conversation pages with SSR, Open Graph metadata, JSON-LD FAQPage schema, and slug-based URLs for SEO and Core Web Vitals.
- Configured CI/CD with **GitHub Actions**, **Playwright** E2E across 4 projects, and Docker Compose production deployment.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
