# Ogbonna Arinze

Berlin, Germany | +49 152 35797306 | arinzeogbo@gmail.com | LinkedIn | arinze.online

## SUMMARY

Senior Frontend Engineer with 8 years building **React** + **JavaScript** interfaces for high-volume systems, including **bank settlement and reconciliation modules at ActivEdge** processing thousands to millions of transactions daily. Has shipped fintech-grade real-time dashboards, role and permission management UIs, and full Vue.js to React migrations at Genentech. Combines deep React/Redux/Redux Toolkit experience with production observability work and Playwright-based automated testing in CI. Nigerian engineer who has worked across Lagos, San Francisco, Beijing, and Berlin teams, with a strong cultural fit for African-market product work and OurNigeria as a recent civic-tech project.

## CORE COMPETENCIES

- **Core Stack:** React (8 years), JavaScript (ESNext), TypeScript, Redux, Redux Toolkit, React Query, RxJS, Axios, Tailwind CSS.
- **High-volume Systems:** Bank Settlement Solution (thousands to millions of daily transactions, 80% lift), real-time reconciliation (60% lift), payment modules (MasterCard, VISA, Express-cash, E-commerce).
- **Real-time:** Native EventSource API for streamed updates over socket.io at ActivEdge; SSE streaming with keepalive heartbeats at OurNigeria.
- **System Monitoring and Observability:** Sentry, Datadog RUM, LogRocket, Lighthouse, Chrome DevTools, Langfuse for LLM observability, Allure Reports for test visibility.
- **Testing and Automation:** Playwright (E2E in CI with Allure on GitHub Pages), Jest, Enzyme, Cypress, Storybook.
- **DevOps:** GitHub Actions CI/CD, Docker / Docker Compose, AWS, Vercel, pnpm + Nx monorepos.
- **Leadership:** Mentored interns and juniors at Genentech, Founders Lair, and Descasio; established team engineering standards.

## WORK EXPERIENCE

**Genentech (Roche)** — San Francisco, CA (Remote)
***Frontend Engineer*** — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** SPA to a **React** Chrome extension with **TypeScript**, owning the rebuild end-to-end across product, design, and engineering.
- Introduced **Redux** for client state and **React Query** for server-state caching and request deduplication, refactored class components to functional, and tuned the build pipeline.
- Implemented **JWT-based** authentication and role-based access control on the frontend with HTTP-only cookies, protected routes, permission-gated UI, and seamless token refresh.
- Architected a reusable design system in **React** and **Radix UI** with **Tailwind CSS**, raising UI consistency, accessibility (WCAG/ARIA), and developer velocity.
- Optimized application performance through lazy loading, code splitting, image optimization, memoization, and CDN delivery, profiled with **Lighthouse** and Chrome DevTools.
- Co-developed a full-stack **Next.js** chat widget powered by RAG (OpenAI, LangChain, Vercel AI SDK, Chroma).
- Integrated **Playwright** E2E into **GitHub Actions** CI/CD with **Allure Reports** on GitHub Pages and Slack notifications, raising release reliability.
- Maintained the existing **Vue.js** codebase in parallel with the React rebuild, fixing bugs and shipping features without regression.
- Mentored two junior developers (interns) through written-first reviews and pair programming.

**ActivEdge Technologies** — Lagos, Nigeria
***Senior React Developer*** — *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 frontend engineers to build a high-volume **bank Settlement Solution**, scaling transaction processing to handle thousands to millions of transactions daily and boosting settlement rates by **80%**.
- Spearheaded development of critical Settlement modules including **MasterCard**, **VISA**, **Express-cash**, and **E-commerce**, using **React** with **Redux** for state, **RxJS** for streamed data, and **Axios** for asynchronous APIs.
- Developed a real-time account reconciliation solution, lifting daily reconciliation by **60%** through new transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming in place of socket.io, improving update latency and reducing the dependency surface.
- Built dynamic data visualization dashboards using **React** and **react-chartjs**, streamlining role and permission management with **Redux Toolkit** and **Ant Design**.

**Descasio** — Lagos, Nigeria (Hybrid)
***Senior Frontend Developer*** — *May 2021 - Mar 2023*

- Led the design and implementation of a greenfield **React** + **TypeScript** cloud console interface, achieving a **25% boost in user engagement** and accelerating delivery by **30%**.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, cut bundle size **30-40%**, achieving **35% faster** initial load.
- Drove a **40% improvement** in runtime performance by reworking caching strategies.
- Introduced **Jest** and **Enzyme** testing plus **Storybook**, leading to a **20% drop** in bug reports.
- Established team engineering standards via **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**.
- Mentored junior engineers on frontend best practices.

**Founders Lair** Beijing, China (Remote)
***Full Stack Engineer (Contract)*** *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs with **MongoDB** models translated from business requirements.
- Converted Figma designs into reusable **React** components.
- Engineered a CI/CD pipeline for automated API deployment to Heroku and AWS production.
- Mentored two interns through structured frontend and backend project work.

**SureTrade Business Solutions** Nigeria
***Frontend Developer*** *Mar 2018 - Oct 2019*

- Built **SureEdu**, a school management portal, in a team of 5: staff payroll/attendance, student records, guardian portals.
- Designed **MongoDB** schemas and implemented server-side **NodeJS** logic with REST endpoints.
- Authored use cases, translated them into database models, and wrote feature documentation per application.

## PROJECTS

**OurNigeria** ournigeria.ng
***Senior Engineer*** *Feb 2026 - Present*

*AI-powered Nigerian budget transparency platform with multi-agent LLM pipeline analyzing 700+ documents (708K+ vector embeddings) across 37 states.*

- Architected the platform as an **Nx monorepo** of 6 apps including **Next.js** citizen-facing web, admin dashboard, and marketing landing built with **React 19**, **TypeScript**, **Tailwind CSS v4**, and **Recharts** visualizations.
- Built an SSE-streamed conversational chat backed by a multi-agent AI system for citizens to query government spending in plain English or Pidgin.
- Configured CI/CD with **GitHub Actions**, **Playwright** E2E across 4 projects, Docker Compose production deployment with health checks, and **Langfuse** for LLM observability.

## EDUCATION

**University of Nigeria** Nsukka, Enugu
*BSc Computer Science - 4.1 CGPA* *Graduation Date: Sep 2019*
