SUMMARY

Senior Frontend Engineer with 8 years leading **React** + **Next.js** + **TypeScript** delivery on complex B2B products. Architected a Radix UI design system at Genentech (Roche) and a 6-app Nx monorepo at OurNigeria, where AI-augmented development was central to shipping a multi-agent LLM platform for civic tech. Strong UI/UX instinct from end-to-end ownership across clinical-trial workflows, bank settlement dashboards, and AI-powered chat surfaces. Comfortable iterating with users, defining the bar for the team, and bringing AI tooling into the daily development loop.

CORE COMPETENCIES

- **Core Stack:** React, Next.js, TypeScript (advanced generics, utility types), Tailwind CSS, Radix UI, modern CSS, responsive layouts.
- **B2B Product Craft:** Genentech clinical trial integrations, Descasio cloud console, ActivEdge bank settlement modules; complex flows with role-based UI and audit-friendly UX.
- **AI-augmented Development:** Daily AI tooling in the dev loop; OpenAI API, LangChain, Vercel AI SDK, Mastra multi-agent framework, RAG pipelines (pgvector + BM25 + RRF + Cohere rerank).
- **Frontend Performance and Quality:** Lighthouse, Core Web Vitals, code splitting, lazy loading, React Profiler, bundle analysis, ESLint/Prettier/Husky standards.
- **Testing:** Playwright (E2E in CI with Allure), Jest, Enzyme, Cypress, Storybook component documentation.
- **End-to-end Ownership:** Discovery, design partnership, implementation, testing, and production rollout, often as the only frontend on the feature.
- **Standards Setting:** Established ESLint/Prettier/Husky/Lint-staged + GitHub Actions baselines at Descasio; design-system architecture at Genentech.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** SPA to a **React** Chrome extension with **TypeScript**, owning the rebuild end-to-end across product, design, and engineering.
- Architected a reusable design system in **React** and **Radix UI** with **Tailwind CSS**, raising UI consistency, accessibility (WCAG/ARIA), and developer velocity across multiple product teams.
- Co-developed a full-stack **Next.js** chat widget powered by RAG (OpenAI, LangChain, Vercel AI SDK, Chroma), embeddable on external sites with delightful streaming UX for technical users.
- Implemented **JWT-based** auth with HTTP-only cookies, role-based access control, protected routes, and seamless token refresh on the frontend.
- Introduced **Redux** for client state and **React Query** for server-state caching and request deduplication, refactored class components to functional, tuned the build pipeline.
- Optimized application performance through lazy loading, code splitting, image optimization, memoization, and CDN delivery, profiled with **Lighthouse** and Chrome DevTools.
- Integrated **Playwright** E2E into **GitHub Actions** CI/CD with **Allure Reports** on GitHub Pages and Slack notifications.
- Maintained the existing **Vue.js** codebase in parallel with the React rebuild, fixing bugs and shipping features without regression.
- Mentored two junior developers (interns) through written-first reviews and pair programming.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of a greenfield **React** + **TypeScript** cloud console interface for a complex B2B platform, achieving a **25% boost in user engagement** and accelerating delivery by **30%** through a scalable frontend architecture.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, cut bundle size **30-40%** via rollup-plugin-visualizer and webpack-bundle-analyzer, achieving **35% faster** initial load.
- Drove a **40% improvement** in runtime performance by reworking caching strategies across the React application.
- Documented React components with **Storybook**, streamlining change management and supporting agile delivery with precise user-story planning.
- Introduced **Jest** and **Enzyme** testing frameworks, leading to a **20% drop** in bug reports.
- Established team engineering standards via **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**, raising the bar for the whole team.
- Mentored junior engineers on frontend best practices.

ActivEdge Technologies Lagos, Nigeria

Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in a team of 3, handling thousands to millions of transactions daily and boosting settlement rates by **80%**.
- Developed payment modules (MasterCard, VISA, Express-cash, E-commerce) with **React**, **Redux**, **RxJS**, and **Axios**.
- Built a real-time account reconciliation tool, lifting daily reconciliation by **60%**.
- Adopted the native **EventSource API** for real-time data streaming over socket.io.
- Built dashboards with **react-chartjs**, **Redux Toolkit**, and **Ant Design**.

Founders Lair Beijing, China (Remote)

Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs and translated business requirements into efficient **MongoDB** models.
- Converted Figma designs into reusable **React** components.
- Engineered a CI/CD pipeline for automated API deployment to Heroku and AWS production servers.
- Mentored two interns through structured frontend and backend project work.

SureTrade Business Solutions Nigeria

Frontend Developer *Mar 2018 - Oct 2019*

- Built **SureEdu**, a school management portal, in a team of 5: staff payroll/attendance, student records, guardian portals.
- Designed **MongoDB** schemas and implemented server-side **NodeJS** logic with REST endpoints.
- Authored use cases, translated them into database models, and wrote feature documentation per application.

PROJECTS

OurNigeria ournigeria.ng

Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget transparency platform shipped at AI-augmented pace by a single engineer. Multi-agent LLM pipeline over 700+ documents and 708K+ vector embeddings.

- Architected the platform as an **Nx monorepo** of 6 apps: **NestJS** API, **NestJS** ingestion pipeline, three **Next.js** apps (citizen web, admin dashboard, marketing landing), and a Remotion video service, orchestrated with **pnpm**.
- Designed and built a **multi-agent AI system** on the **Mastra** framework with 5 specialized agents (Router, Budget, Corruption, GovSpend, Impact) using three-stage intent classification and domain-specific RAG analysis.
- Built a hybrid **RAG** pipeline (pgvector + BM25 + Reciprocal Rank Fusion + Cohere rerank) over 708K+ Voyage AI embeddings.
- Built the **Next.js** citizen-facing frontend with **React 19**, **TypeScript**, **Tailwind CSS v4**, dark mode, URL state via nuqs, and 22 interactive Recharts visualizations auto-generated from AI responses.
- Configured CI/CD with **GitHub Actions**, **Playwright** E2E across 4 projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, memory limits, and 30s graceful shutdown.

EDUCATION

University of Nigeria Nsukka, Enugu

BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
