SUMMARY

Senior Software Engineer with 8 years of **React** + **TypeScript** + **Next.js** delivery on performance-sensitive, regulated, and high-throughput products. Architect of a Radix UI design system at Genentech (Roche) and a 6-app Nx monorepo at OurNigeria. Has shipped responsive cross-device interfaces backed by SSE streaming, real-time settlement dashboards, and embedded chat widgets, with measurable wins in bundle size (30-40% reduction) and load time (35% faster). Comfortable balancing speed and quality in fast-paced startup environments and leading architecture and performance discussions.

CORE COMPETENCIES

- **Core Stack:** React, TypeScript (advanced generics, utility types), Next.js, modern CSS, Tailwind CSS, Radix UI, responsive layouts, dark mode.
- **Component Libraries and Design Systems:** Architected a Radix UI design system at Genentech with WCAG/ARIA discipline; documented components with Storybook at Descasio; Ant Design at ActivEdge.
- **Performance:** 30-40% bundle reduction with rollup-plugin-visualizer/webpack-bundle-analyzer, 35% faster load, 40% runtime gain via caching, Core Web Vitals tuning, React Profiler, Lighthouse.
- **Cross-device:** Mobile-first responsive layouts at OurNigeria with mobile Pixel 5 Playwright coverage, Chrome extension at Genentech.
- **Architecture and Standards:** ESLint/Prettier/Husky/Lint-staged + GitHub Actions baselines; Nx and pnpm monorepos; module federation patterns.
- **Testing:** Playwright (E2E in CI with Allure on GitHub Pages), Jest, Enzyme, Cypress, Storybook.
- **Leadership:** Cross-functional design partnership with PMs and designers, mentored interns and juniors at Genentech and Founders Lair, established Descasio team standards.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** SPA to a **React** Chrome extension with **TypeScript**, owning the rebuild end-to-end.
- Architected a reusable design system in **React** and **Radix UI** with **Tailwind CSS**, raising UI consistency, accessibility (WCAG/ARIA), and developer velocity across products.
- Co-developed a full-stack **Next.js** chat widget powered by RAG (OpenAI, LangChain, Vercel AI SDK, Chroma), embeddable on external sites with streaming UX.
- Introduced **Redux** for client state and **React Query** for server-state caching and request deduplication, refactored class components to functional, tuned the build pipeline.
- Implemented **JWT-based** auth with HTTP-only cookies, RBAC-driven UI, protected routes, and seamless token refresh on the frontend.
- Optimized application performance through lazy loading, code splitting, image optimization, memoization, and CDN delivery, profiled with **Lighthouse** and Chrome DevTools.
- Integrated **Playwright** E2E into **GitHub Actions** CI/CD with **Allure Reports** on GitHub Pages and Slack notifications.
- Maintained the existing **Vue.js** codebase in parallel with the React rebuild, fixing bugs and shipping features without regression.
- Mentored two junior developers (interns) through written-first reviews and pair programming.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of a greenfield **React** + **TypeScript** cloud console interface, achieving a **25% boost in user engagement** and accelerating delivery by **30%** through a scalable frontend architecture.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse**, cut bundle size **30-40%** via rollup-plugin-visualizer and webpack-bundle-analyzer, achieving **35% faster** initial load.
- Drove a **40% improvement** in runtime performance by reworking caching strategies across the React application.
- Documented React components with **Storybook**, streamlining change management and supporting agile delivery.
- Introduced **Jest** and **Enzyme** testing frameworks, leading to a **20% drop** in bug reports.
- Established team engineering standards via **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**.
- Mentored junior engineers on frontend best practices.

ActivEdge Technologies — Lagos, Nigeria
Senior React Developer — *Oct 2019 - Sep 2021*

- Built a high-volume bank Settlement Solution in a team of 3, handling thousands to millions of transactions daily and boosting settlement rates by **80%**.
- Developed payment modules (MasterCard, VISA, Express-cash, E-commerce) with **React**, **Redux**, **RxJS** for streamed data flows, and **Axios**.
- Built a real-time account reconciliation tool, lifting daily reconciliation by **60%**.
- Adopted the native **EventSource API** for real-time data streaming over socket.io, improving latency.
- Built dashboards with **react-chartjs**, **Redux Toolkit**, and **Ant Design**.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS** RESTful APIs with **MongoDB** models translated from business requirements.
- Converted Figma designs into reusable **React** components.
- Engineered a CI/CD pipeline for automated API deployment to Heroku and AWS production.
- Mentored two interns through structured frontend and backend project work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Built **SureEdu**, a school management portal, in a team of 5: staff payroll/attendance, student records, guardian portals.
- Designed **MongoDB** schemas and implemented server-side **NodeJS** logic with REST endpoints.
- Authored use cases, translated them into database models, and wrote feature documentation per application.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget transparency platform with multi-agent LLM pipeline analyzing 700+ documents and 708K+ vector embeddings.

- Architected the platform as an **Nx monorepo** of 6 apps: NestJS API, NestJS ingestion pipeline, three **Next.js** apps (citizen web, admin dashboard, marketing landing), and a Remotion video service, orchestrated with **pnpm**.
- Built the **Next.js** citizen-facing frontend with **React 19**, **TypeScript**, **Tailwind CSS v4**, dark mode, URL state via nuqs, mobile-first responsive layouts, and 22 interactive Recharts visualizations.
- Implemented SSE streaming for real-time chat with keepalive heartbeats every 15s, token-budgeted context windows, and conversation summarization.
- Configured CI/CD with **GitHub Actions**, **Playwright** E2E across 4 projects (web auth, dashboard auth, desktop, mobile Pixel 5), and Docker Compose production deployment with multi-stage Dockerfiles.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
