SUMMARY

Frontend Engineer with 8 years of professional experience building scalable, user-centric web applications across healthcare, fintech, and enterprise environments. Deep expertise in React, TypeScript, and JavaScript, with a strong track record of collaborating with UX/UI designers and cross-functional agile teams to deliver client-facing products. Experienced in micro-frontend architectures, REST API integration, CI/CD pipelines, and driving code quality through automated testing, code reviews, and engineering standards.

CORE COMPETENCIES

- **Frontend Development:** React, TypeScript, JavaScript (ESNext), Next.js, Vue.js, Redux, Zustand, React Query, and Tailwind CSS.
- **Architecture & Patterns:** Scalable component systems, design systems, micro-frontends, monorepos (Nx), SSR/SSG, and responsive layouts.
- **Testing & Quality:** Playwright, Jest, Enzyme, Cypress, Storybook, Allure Reports, ESLint, Prettier, and CI-driven QA.
- **API Integration:** REST APIs, GraphQL, Axios, JWT authentication, role-based access control (RBAC), and real-time data streaming (SSE, EventSource).
- **CI/CD & Infrastructure:** GitHub Actions, Docker, AWS (CloudFront, S3), Vercel, Webpack/Vite/Rollup, and automated deployment pipelines.
- **Performance & Observability:** Core Web Vitals, Lighthouse, code splitting, lazy loading, CDN strategies, bundle analysis, and React Profiler.
- **Collaboration & Leadership:** Agile/Scrum, code reviews, task estimation, requirements gathering, mentorship, and technical documentation.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React Chrome extension**, collaborating closely with UX/UI designers to optimize workflows for clinical site integrations and enhance user adoption.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Optimized application performance by implementing **lazy loading, code splitting**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools. Applied responsive layouts and memoization to minimize re-renders across devices.
- Implemented **JWT-based authentication** and **role-based access control** in **React** with **TypeScript**, using HTTP-only cookies for secure token handling and permission-based UI rendering, collaborating with backend engineers to align on auth strategies.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility on every push.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, and Chroma vector database, enabling users to query their data in real time via a conversational interface.
- Maintained and extended the existing **Vue.js** codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild.
- Mentored a team of two junior developers (interns), conducting code reviews and fostering a culture of technical excellence.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience.
- Enhanced development workflow by introducing **Jest** and **Enzyme** automated testing frameworks, leading to a **20% decrease** in bug reports.

- Utilized **Storybook** for documenting React components, streamlining change management and supporting agile project management practices, including requirements gathering, user stories, estimates, and work plans.
- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating **CI/CD** processes across the team.
- Mentored junior engineers on frontend best practices, conducting code reviews and fostering high-quality, maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous **REST API** requests.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface.
- Built dynamic data visualization dashboards using **React** and **react-chartjs**, managing user roles and permissions with **Redux Toolkit** and **Ant Design** UI.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface aligned with UX requirements.
- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas, focusing on testable, maintainable code.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments on **Heroku** and production servers on **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and overseeing task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, and converting business requirements into database schemas and technical documentation.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications** including a **Next.js** citizen-facing web app with **React 19**, **Tailwind CSS**, and 22 interactive chart types via Recharts, plus an admin dashboard and marketing landing page.
- Built the **Next.js** frontend with responsive mobile layouts, dark mode, URL state management, and **SSR** for SEO optimization (Open Graph metadata, JSON-LD schema, slug-based URLs).
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** end-to-end tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles and health checks.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
