PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8 years of professional experience building React and TypeScript applications across healthcare, fintech, civic tech, and enterprise SaaS environments. Strong track record translating product requirements, wireframes, and backend capabilities into performant user interfaces, API-heavy workflows, and maintainable frontend architecture using React, Next.js, Redux, React Query, and modern testing practices. Product-minded collaborator with hands-on experience shipping features with designers, product managers, and backend engineers, while improving performance, test coverage, CI/CD reliability, and developer workflows.

CORE COMPETENCIES

- **Frontend Product Engineering:** React, TypeScript, Next.js, Vue.js, responsive UI implementation, design systems, component architecture, and product-oriented feature delivery.
- **State Management and Data Flows:** Redux, Redux Toolkit, React Query, Zustand, Axios, Fetch API, RBAC-aware UI patterns, and API-heavy frontend integration.
- **Testing and Quality:** Playwright, Jest, Enzyme, Storybook, ESLint, Prettier, Husky, Lint-staged, Allure Reports, and CI-driven testing workflows.
- **Performance and Developer Experience:** Lighthouse, Chrome DevTools, React Profiler, webpack-bundle-analyzer, rollup-plugin-visualizer, lazy loading, code splitting, and bundle optimization.
- **Backend and Platform Collaboration:** NodeJS REST APIs, JWT-based auth flows, React components from Figma, CI/CD ownership, AWS and Heroku deployments, and cross-functional delivery.
- **Cloud and Delivery:** GitHub Actions, AWS, Docker, pnpm, monorepo workflows, deployment automation, and end-to-end ownership of shipped features.
- **Leadership and Ways of Working:** Mentorship, code reviews, Agile collaboration, requirements refinement, architecture discussions, and strong product mindset.

PROFESSIONAL EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial site data to upstream EHR systems, migrating from a Vue.js web application to a React Chrome extension.
- Maintained and extended the legacy Vue.js application during the migration period, fixing bugs and shipping features in parallel with the React rebuild to keep delivery moving without disrupting users.
- Optimized application performance through lazy loading, code splitting, image optimization, responsive layouts, memoization, and CDN-backed asset delivery, reducing load times and improving responsiveness across devices.
- Implemented frontend authentication and authorization workflows using JWT-based flows, HTTP-only cookies, protected routes, token refresh handling, and permission-based UI rendering in close partnership with backend engineers.
- Introduced Redux for state management and React Query for request caching, while refactoring legacy React code from class components to functional components to improve maintainability and developer experience.
- Increased stakeholder confidence by writing Playwright end-to-end tests in the CI/CD pipeline, publishing Allure reports on GitHub Pages, and sending Slack notifications with links to test results on every push.
- Co-developed a full-stack Next.js chat widget powered by OpenAI, LangChain, Vercel AI SDK, and Chroma, enabling users to connect data sources, embed the widget on external sites, and query their data in real time through a conversational interface.
- Architected a reusable design system in React and Radix UI that improved UI consistency, accessibility, and developer efficiency across products, while mentoring two junior developers through daily implementation and review support.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive React user interface that drove a 25% boost in user engagement, while collaborating with architects to create a scalable frontend architecture that accelerated development by 30%.
- Enhanced the development workflow by introducing Jest and Enzyme, leading to a 20% decrease in bug reports and improving confidence in shipped features.
- Used Storybook to document React components, streamline change management, and support clearer communication of implementation details across the team.
- Drove a 40% improvement in React application performance by optimizing caching mechanisms and tightening data flow efficiency across the product.
- Profiled and resolved render bottlenecks using React Profiler and Lighthouse, then reduced bundle size by 30-40% with rollup-plugin-visualizer and webpack-bundle-analyzer, leading to a 35% faster load time.

- Established engineering standards for code quality, testing, and deployment using ESLint, Prettier, Husky, Lint-staged, and GitHub Actions, reducing errors and accelerating CI/CD workflows.
- Mentored junior engineers and guided frontend best practices, helping the team maintain high-quality, consistent, and maintainable code while supporting agile planning and user-story refinement.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of three frontend engineers building a high-volume bank Settlement Solution that handled thousands to millions of transactions daily, boosting settlement rates by 80%.
- Spearheaded development of critical modules for MasterCard, VISA, Express-cash, and e-commerce flows using React, Redux, RxJS, and Axios.
- Developed a real-time account reconciliation solution that boosted daily transaction reconciliation by 60% through improved transaction processing and data management strategies.
- Enhanced system responsiveness by adopting the native EventSource API for real-time data streaming and built data visualization dashboards with react-chartjs, Redux Toolkit, and Ant Design.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas, working closely with the business team to ensure technical solutions matched product needs.
- Developed NodeJS REST APIs for new features with a focus on testable, maintainable, and well-documented code.
- Converted user journeys and Figma designs into reusable React components, delivering a consistent and intuitive user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments on Heroku and production servers on AWS, while mentoring two interns across frontend and backend work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed MongoDB schemas and implemented them in NodeJS for multiple applications, contributing to both server-side logic and frontend integration.
- Worked with a team of five to build SureEdu, a school management portal for attendance, payroll, exams, reports, and guardian workflows.
- Developed user use cases, converted them into database models, documented application functionality end to end, and tested user-defined functions, triggers, and API endpoints.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking, processing 700+ budget documents across 37 states.

- Architected and built the platform as an Nx monorepo managing six applications, including a NestJS API, Next.js citizen web app, Next.js admin dashboard, NestJS ingestion pipeline, landing page, and Remotion service.
- Built the citizen-facing frontend with React 19, Next.js, Tailwind CSS v4, and Recharts, including responsive mobile layouts and 22 interactive chart types generated from AI responses.
- Implemented SSE streaming for real-time chat responses, URL-aware frontend behavior, shareable public conversations with SEO optimization, and dashboard capabilities for user management and usage analytics.
- Configured CI/CD with GitHub Actions, Playwright end-to-end tests, Docker Compose deployment, and supporting infrastructure such as Traefik, Infisical, and Langfuse for reliable product delivery.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Sep 2019*
