PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8 years of professional experience building React and TypeScript applications for data-heavy products across healthcare, fintech, civic tech, and enterprise software. Strong track record designing reusable UI systems, improving reliability through CI-driven testing, and shipping performant frontend experiences with Redux, Redux Toolkit, React Query, Jest, Playwright, Storybook, and modern build tooling. Product-minded collaborator with hands-on experience working in cross-functional teams, supporting full product ownership, and delivering interfaces that balance usability, scale, and operational confidence.

CORE COMPETENCIES

- **Frontend Engineering:** React, TypeScript, Next.js, Vue.js, responsive interfaces, reusable component systems, and scalable UI architecture.
- **State and Data Flows:** Redux, Redux Toolkit, React Query, Zustand, RxJS, Axios, RBAC-aware UI patterns, and real-time event-driven interfaces.
- **Testing and Quality:** Jest, Enzyme, Playwright, Storybook, Allure Reports, GitHub Actions, ESLint, Prettier, Husky, and Lint-staged.
- **Performance and Tooling:** Lighthouse, Chrome DevTools, React Profiler, Webpack, Rollup, webpack-bundle-analyzer, rollup-plugin-visualizer, lazy loading, and code splitting.
- **Design Systems and UI Libraries:** Radix UI, Tailwind CSS, Ant Design, Storybook documentation, accessibility-aware component design, and Figma-to-code workflows.
- **Platform and Delivery:** GitHub Actions, CI/CD pipelines, AWS, Docker, Nx monorepos, pnpm workspaces, and close collaboration with backend, product, and QA.
- **Leadership:** Mentorship, code reviews, architecture discussions, Agile delivery, and product-minded engineering in distributed teams.

PROFESSIONAL EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial site data to upstream EHR systems, migrating from a Vue.js web application to a React Chrome extension.
- Maintained and extended the Vue.js codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild to preserve delivery momentum.
- Optimized application performance with lazy loading, code splitting, image optimization, responsive layouts, memoization, and CDN-backed asset delivery, improving load times and responsiveness across devices.
- Implemented frontend authentication and authorization workflows using JWT-based flows, HTTP-only cookies, protected routes, secure token refresh handling, and permission-based UI rendering.
- Introduced Redux for state management and React Query for request caching, refactoring legacy React code from class components to functional components to improve maintainability and data flow.
- Increased stakeholder confidence by writing Playwright end-to-end tests in the CI/CD pipeline, publishing Allure reports on GitHub Pages, and sending Slack notifications with links to generated results on every push.
- Co-developed a full-stack Next.js chat widget powered by OpenAI, LangChain, Vercel AI SDK, and Chroma, enabling real-time conversational access to connected data sources.
- Architected a reusable design system in React and Radix UI that improved UI consistency, accessibility, and developer efficiency across products, while mentoring two junior developers through day-to-day implementation support.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive React user interface that drove a 25% boost in user engagement, while helping create a scalable frontend architecture that accelerated development by 30%.
- Enhanced the development workflow by introducing Jest and Enzyme, leading to a 20% decrease in bug reports and improving confidence in shipped frontend changes.
- Used Storybook to document React components, streamline change management, and improve communication around implementation details across the team.
- Drove a 40% improvement in React application performance by optimizing caching mechanisms and tightening data flow efficiency across the product.
- Profiled and resolved render bottlenecks using React Profiler and Lighthouse, then reduced bundle size by 30-40% with rollup-plugin-visualizer and webpack-bundle-analyzer, leading to a 35% faster load time.
- Established engineering standards for code quality, testing, and deployment using ESLint, Prettier, Husky, Lint-staged, and GitHub Actions, reducing errors and accelerating CI/CD workflows.

- Mentored junior engineers and guided frontend best practices, fostering a culture of maintainable code, consistent delivery standards, and collaborative engineering quality.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of three frontend engineers to build a high-volume bank Settlement Solution that handled thousands to millions of transactions daily, boosting settlement rates by 80%.
- Spearheaded development of critical modules for MasterCard, VISA, Express-cash, and e-commerce workflows using React, Redux, RxJS, and Axios.
- Developed a real-time account reconciliation solution that boosted daily transaction reconciliation by 60% through improved transaction processing and data management strategies.
- Enhanced system responsiveness by adopting the native EventSource API for real-time data streaming and built data visualization dashboards with react-chartjs, Redux Toolkit, and Ant Design.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions matched product needs.
- Developed NodeJS REST APIs for new features with a focus on testable, maintainable, and well-documented code.
- Transformed user journeys and Figma designs into reusable React components, ensuring a consistent and intuitive user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments on Heroku and production servers on AWS, while mentoring two interns across frontend and backend work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed MongoDB database schemas and implemented them in NodeJS for multiple applications, contributing to both backend logic and frontend integration.
- Worked with a team of five to develop SureEdu, a school management portal covering staff attendance and payroll, student records, exams, reports, and guardian workflows.
- Developed user use cases, converted them into database schemas and models, documented application behavior in detail, and tested functions, triggers, and API endpoints for reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking, processing 700+ budget documents across 37 states.

- Architected and built the platform as an Nx monorepo managing six applications, including a NestJS API, Next.js citizen web app, Next.js admin dashboard, NestJS ingestion pipeline, landing page, and Remotion service.
- Built the citizen-facing frontend with React 19, Next.js, Tailwind CSS v4, and Recharts, including responsive mobile layouts and 22 interactive chart types generated from AI responses.
- Implemented SSE streaming for real-time chat responses, admin dashboard capabilities, and shareable public conversations with SEO optimization and server-rendered pages.
- Configured CI/CD with GitHub Actions, Playwright end-to-end tests, Docker Compose deployment, and supporting platform infrastructure for reliable product delivery.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Sep 2019*
