PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8 years of professional experience building React and TypeScript applications across healthcare, fintech, civic tech, and enterprise software. Strong track record designing scalable frontend systems, improving developer workflows through CI/CD and testing automation, and collaborating closely with product, UX/UI, QA, and engineering stakeholders to deliver maintainable, cloud-ready web applications. Experienced in reusable component systems, performance optimization, Redux-based state management, Storybook documentation, and cross-team frontend standards in environments that value stability, quality, and technical ownership.

CORE COMPETENCIES

- **Frontend Engineering:** React, TypeScript, Next.js, Vue.js, reusable UI systems, responsive layouts, and scalable component architecture.
- **State Management and Data Flows:** Redux, Redux Toolkit, React Query, Zustand, Axios, RxJS, and API-heavy frontend integration.
- **Testing and Code Quality:** Playwright, Jest, Enzyme, Storybook, ESLint, Prettier, Husky, Lint-staged, Allure Reports, and CI-driven validation.
- **Build and Performance Tooling:** Webpack, Rollup, Lighthouse, React Profiler, Chrome DevTools, webpack-bundle-analyzer, rollup-plugin-visualizer, lazy loading, and code splitting.
- **Platform and Delivery:** GitHub Actions, CI/CD pipelines, AWS, Heroku, Docker, monorepo workflows, and cross-functional delivery with product, design, and QA.
- **Architecture and Team Impact:** Frontend architecture, design systems, maintainable code standards, mentorship, technical reviews, and stakeholder collaboration.
- **Cloud-Ready Product Development:** Enterprise-style UI delivery, scalable frontend systems, dashboard and data-heavy applications, and long-term maintainability.

PROFESSIONAL EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial site data to upstream EHR systems, migrating from a Vue.js web application to a React Chrome extension.
- Maintained and extended the existing Vue.js codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild while preserving delivery continuity.
- Optimized application performance by implementing lazy loading, code splitting, image optimization, responsive layouts, memoization, and efficient CDN-backed asset delivery, improving load times and responsiveness across devices.
- Implemented frontend authentication and authorization workflows using JWT-based flows, HTTP-only cookies, protected routes, secure token refresh handling, and permission-based UI rendering in close collaboration with backend engineers.
- Introduced Redux for state management and React Query for request caching, refactoring legacy React code from class components to functional components to improve developer experience and maintainability.
- Increased stakeholder confidence by writing Playwright end-to-end tests in the CI/CD pipeline, publishing Allure reports on GitHub Pages, and sending Slack notifications with links to generated test results on every push.
- Architected a reusable design system in React and Radix UI that improved UI consistency, accessibility, and developer efficiency across products.
- Mentored a team of two junior developers, supporting technical excellence and stronger frontend implementation practices across the team.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive React user interface that drove a 25% boost in user engagement, while collaborating with architects to create a scalable frontend architecture that accelerated development by 30%.
- Enhanced the development workflow by introducing Jest and Enzyme, leading to a 20% decrease in bug reports and improving confidence in shipped frontend work.
- Used Storybook to document React components, streamline change management, and ensure clearer communication of implementation details across the team.
- Drove a 40% improvement in React application performance by optimizing caching mechanisms across the product.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks using React Profiler and Lighthouse, reducing bundle size by 30-40% through rollup-plugin-visualizer and webpack-bundle-analyzer, which led to a 35% faster load time.

- Established engineering standards for code quality, testing, and deployment using ESLint, Prettier, Husky, Lint-staged, and GitHub Actions, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent design across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of three frontend engineers to build a high-volume bank Settlement Solution, significantly enhancing transaction processing capabilities to handle thousands to millions of transactions daily, boosting settlement rates by 80%.
- Spearheaded development of critical modules for settlement workflows, including MasterCard, VISA, Express-cash, and e-commerce modules, using React, Redux, RxJS, and Axios.
- Developed a real-time account reconciliation solution, boosting reconciliation of daily transactions by 60% through improved transaction processing and data management strategies.
- Enhanced system responsiveness by adopting the native EventSource API for real-time data streaming and built dynamic data visualization dashboards using react-chartjs, Redux Toolkit, and Ant Design.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions met product needs.
- Developed NodeJS REST APIs to power new features, focusing on testable, maintainable, and well-documented code.
- Transformed user journeys and Figma designs into reusable React components, ensuring a consistent and intuitive user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments on Heroku and production servers on AWS, while mentoring two interns across frontend and backend projects.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed MongoDB database schemas and implemented them in NodeJS for multiple applications.
- Worked with a team of five to develop SureEdu, a school management portal for staff attendance and payroll, student records, exams, reports, and guardian workflows.
- Developed user use cases and converted them into database schemas and models, while documenting application capabilities and testing functions, triggers, and API endpoints.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking, processing 700+ budget documents across 37 states.

- Architected and built the platform as an Nx monorepo managing six applications, including a NestJS API, Next.js citizen web app, Next.js admin dashboard, NestJS document ingestion pipeline, landing page, and Remotion service.
- Built the citizen-facing frontend with React 19, Next.js, Tailwind CSS v4, and Recharts, including responsive mobile layouts and 22 interactive chart types generated from AI responses.
- Implemented SSE streaming for real-time chat responses, dashboard capabilities, shareable public conversations with SEO optimization, and server-rendered public pages.
- Configured CI/CD with GitHub Actions, Playwright end-to-end tests, Docker Compose production deployment, and platform infrastructure for reliable multi-application delivery.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Sep 2019*
