PROFESSIONAL SUMMARY

Frontend engineer with 8 years of professional experience building user-facing products across healthcare, fintech, civic tech, and enterprise software. Strong experience with React, Next.js, TypeScript, and design-conscious frontend delivery, with a track record of improving usability, performance, and developer workflows in product teams that value autonomy and collaboration. Comfortable contributing beyond coding into UX refinement, product thinking, testing discipline, and adjacent backend concerns while shipping polished interfaces in remote and cross-functional environments.

CORE COMPETENCIES

- **Frontend Development:** React, Next.js, TypeScript, Vue.js, reusable component systems, responsive design, and polished interface delivery.
- **UX and Product Collaboration:** Design systems, Storybook, Figma-to-code workflows, product-minded iteration, and close collaboration with designers, product managers, and stakeholders.
- **Performance and Quality:** Lighthouse, React Profiler, Chrome DevTools, Jest, Enzyme, Playwright, GitHub Actions, and CI-driven validation.
- **State and Data Handling:** Redux, Redux Toolkit, React Query, Zustand, Axios, RxJS, and API-backed frontend application flows.
- **Adjacent Backend and Delivery:** NodeJS REST APIs, authentication flows, CI/CD pipelines, AWS, Heroku, and practical fullstack collaboration.
- **Team Impact:** Mentorship, agile delivery, self-direction, clean-code standards, and ownership in small and cross-functional teams.

PROFESSIONAL EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial site data to various upstream EHR systems, migrating from a Vue.js web application to a Chrome extension in React.
- Maintained and extended the existing Vue.js codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild.
- Optimized application performance by implementing lazy loading, code splitting, and image optimization, significantly reducing load times while improving responsiveness across devices with responsive layouts, memoization, and efficient asset delivery via CDN.
- Implemented authentication and authorization workflows on the frontend using JWT-based flows, HTTP-only cookies, protected routes, and permission-based UI rendering in close collaboration with backend engineers.
- Introduced Redux for state management and React Query for request caching, refactoring legacy React code from class components to functional components and improving maintainability across the application.
- Increased stakeholder confidence by writing end-to-end tests with Playwright in the CI/CD pipeline, publishing test results on GitHub Pages using Allure Reports, and sending Slack notifications with links to generated results on every push.
- Architected a reusable design system in React and Radix UI that improved UI consistency, accessibility, and developer efficiency across products.
- Mentored a team of two junior developers, fostering a culture of technical excellence and stronger frontend implementation practices.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive user interface using React, achieving a 25% boost in user engagement while collaborating closely with software architects to create a scalable frontend architecture and accelerate development by 30%.
- Enhanced the development workflow by introducing automated testing frameworks, including Jest and Enzyme, which led to a 20% decrease in bug reports.
- Utilized Storybook for documenting React components, streamlining change management and ensuring clear communication of development processes while supporting user story planning, estimates, and work plans.
- Drove a 40% improvement in React application performance by optimizing caching mechanisms and significantly boosting speed and user experience.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks using React Profiler and Lighthouse Audits, reducing bundle size by 30-40%, which led to a 35% faster load time and smoother runtime experience across devices.
- Established engineering standards for code quality, testing, and deployment using ESLint, Prettier, Husky, Lint-staged, and GitHub Actions, reducing errors and accelerating CI/CD processes.

- Mentored junior engineers and guided frontend best practices, fostering a culture of high-quality, maintainable code and consistent design across projects.

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking, designed as a user-facing product with responsive interfaces and conversational workflows.

- Architected and built the entire platform as an Nx monorepo managing 6 applications, including a Next.js citizen-facing web app, admin dashboard, API backend, ingestion pipeline, marketing site, and video generation service.
- Built the Next.js citizen-facing frontend with React 19, Tailwind CSS v4, and Recharts, featuring 22 interactive chart types, dark mode, URL state management, and responsive mobile layouts.
- Implemented shareable public conversations with SEO optimization, server-rendered public pages, and real-time SSE streaming for responsive chat experiences.
- Configured CI/CD with GitHub Actions, Playwright end-to-end tests, and Docker Compose production deployment to support reliable multi-application delivery.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions met business needs.
- Developed NodeJS RESTful APIs to power new features, focusing on testable, maintainable, and well-documented code.
- Transformed user journeys and Figma designs into reusable React components, ensuring a consistent, intuitive user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments on Heroku and production servers on AWS, while guiding two interns through frontend and backend projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 frontend engineers to build a high-volume bank Settlement Solution, significantly enhancing transaction processing capabilities to handle thousands to millions of transactions daily, boosting transaction settlement rates by 80%.
- Spearheaded the development of critical modules for the Settlement Solution, including MasterCard, VISA, Express-cash, and E-commerce modules, using React with Redux for state management, RxJS for data streaming, and Axios for asynchronous API requests.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by 60% through innovative transaction processing and data management strategies.
- Built dynamic data visualization dashboards using React and react-chartjs, streamlining management of user roles and permissions with Redux Toolkit and Ant Design UI.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed MongoDB database schemas and implemented them in NodeJS for multiple applications.
- Worked with a team of 5 to develop SureEdu, a school management portal for school owners to manage staff, students, and guardians.
- Responsible for server-side web application logic as well as integration of the frontend, developing user use cases and converting them into database schemas and models.
- Devised documentation for each application, detailing all aspects, functions, capabilities, and features, and tested user-defined functions, triggers, and API endpoints.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Sep 2019*
