Re: Senior Frontend Entwickler – React (m|w|d)

Sehr geehrte Damen und Herren,

Assecor's commitment to clean code that guarantees long-term functionality, combined with your focus on tailored solutions for enterprise clients, resonates strongly with how I approach frontend engineering. As a Senior Frontend Engineer with 8 years of experience building modern React and TypeScript applications across healthcare, fintech, and enterprise environments, I am excited to contribute to your team in Berlin.

In my current role at Genentech (Roche), I spearheaded the migration of a clinical data product from Vue.js to React, architected a reusable design system with React, Radix UI, and Tailwind CSS that improved accessibility (WCAG) and UI consistency across product teams, and integrated Playwright end-to-end tests into the CI/CD pipeline for reliable releases. Previously at Descasio, I led a React and TypeScript frontend that achieved a 25% boost in user engagement, reduced bundle sizes by 30-40% through systematic performance profiling with React Profiler and Lighthouse, and introduced Jest and Enzyme testing frameworks that decreased bug reports by 20%. I also established engineering standards with ESLint, Prettier, and GitHub Actions, and documented components systematically using Storybook.

What draws me to Assecor specifically is your 360-degree approach to IT consulting, where quality-conscious development and long-lasting client partnerships go hand in hand. I bring the same mindset: structured, test-driven development, responsive and accessible interfaces, thorough documentation, and a commitment to knowledge sharing within teams. With hands-on experience in Vue.js, Docker, and CI/CD pipelines alongside my deep React expertise, I am well-positioned to deliver the kind of maintainable, client-focused solutions Assecor is known for.

I would welcome the opportunity to discuss how my experience can contribute to Assecor's projects and team. I look forward to hearing from you.

Mit freundlichen Grüßen,

Ogbonna Arinze
