SUMMARY

Senior Frontend Engineer with 8 years of professional experience developing modern, responsive web applications using **React**, **TypeScript**, and **Next.js** across healthcare, fintech, and enterprise consulting environments. Deep expertise in building accessible, component-driven user interfaces with consistent design systems, writing comprehensive tests (Jest, Playwright, Cypress), and integrating complex APIs. Experienced with **Vue.js**, responsive CSS, and DevOps tooling including Docker and CI/CD pipelines. Structured, quality-conscious engineer who values clean, well-documented code, test-driven development, and collaborative knowledge sharing within cross-functional teams.

CORE COMPETENCIES

- **Frontend Development:** React, Next.js, Vue.js, TypeScript, JavaScript (ESNext), responsive design, and accessible UI (WCAG/ARIA).
- **UI & Styling:** Tailwind CSS, Radix UI, Ant Design, Storybook, design systems, and CSS best practices for cross-device layouts.
- **State Management:** Redux, Redux Toolkit, Zustand, React Query, RxJS, and efficient data fetching patterns.
- **Testing & Quality:** Jest, Enzyme, Playwright, Cypress, TDD/BDD, Allure Reports, ESLint, Prettier, Husky, and CI-driven QA.
- **API Integration:** REST APIs, GraphQL, JWT authentication, role-based access control, and real-time data streaming (SSE, EventSource).
- **DevOps & Infrastructure:** Docker, GitHub Actions, CI/CD pipelines, AWS (CloudFront, S3), Vercel, and Webpack/Vite/Rollup build tooling.
- **Performance & Observability:** Core Web Vitals, Lighthouse, code splitting, lazy loading, bundle analysis, Sentry, and React Profiler.
- **Leadership & Process:** Technical mentorship, architecture reviews, Agile/Scrum, code documentation, and team knowledge sharing.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, translating complex customer requirements into a streamlined technical solution that enhanced adoption across clinical sites.
- Maintained and extended the existing **Vue.js** codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild to ensure uninterrupted service for users.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, **accessibility (WCAG)**, and developer efficiency across multiple product teams.
- Optimized application performance by implementing **lazy loading, code splitting**, and responsive layouts with memoization, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools, and ensuring responsiveness across devices.
- Implemented **JWT-based authentication** and **role-based access control** with **TypeScript** and **React Query**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, and Vercel AI SDK, enabling users to query their data in real time via a conversational interface.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence, code documentation, and knowledge sharing.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface with **TypeScript**, achieving a **25% boost in user engagement** and collaborating with architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.

- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience across devices.
- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks with a test-driven development approach, leading to a **20% decrease** in bug reports and improved long-term maintainability.
- Utilized **Storybook** for systematically documenting React components, streamlining change management and ensuring clear communication of development processes across the team.
- Established engineering standards for code quality using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable, and well-documented code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, handling thousands to millions of daily transactions and boosting settlement rates by **80%** through robust **React** interfaces.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface across user devices.
- Built dynamic data visualization dashboards using **React** and **react-chartjs**, streamlining management of user roles and permissions with **Redux Toolkit** and **Ant Design** UI components.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions met client needs.
- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent and intuitive user interface with responsive layouts.
- Developed **NodeJS RESTful APIs** with comprehensive documentation and engineered a **CI/CD pipeline** for automated deployment to Heroku and AWS.
- Mentored two interns through frontend and backend projects, providing technical guidance and fostering independent problem-solving skills.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing 15+ REST API endpoints for user management, payroll processing, and attendance tracking.
- Devised comprehensive documentation for each application, detailing all functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications**: NestJS API backend, **Next.js** citizen-facing web app with **React 19** and **Tailwind CSS v4**, Next.js admin dashboard, and a document ingestion pipeline.
- Built the citizen-facing frontend featuring **22 interactive chart types** with **Recharts**, **dark mode**, URL state management, and **responsive mobile layouts** optimized for cross-device access.
- Configured CI/CD with **GitHub Actions** for automated builds, **Playwright** end-to-end tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles and health checks.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
