SUMMARY

Senior Frontend Engineer with 8 years of professional experience building high-quality, customer-facing web applications across fintech, healthcare, and enterprise environments. Deep expertise in **React**, **Next.js**, **TypeScript**, and **JavaScript**, with a strong track record of architecting scalable component systems, building accessible design systems, and optimizing frontend performance for speed and user engagement. Experienced in financial services platforms handling millions of daily transactions, with proven ability to own features end-to-end, improve CI/CD pipelines, mentor engineers, and contribute to architecture decisions in agile, cross-functional teams.

CORE COMPETENCIES

- **Frontend Frameworks:** React, Next.js, Vue.js, TypeScript, JavaScript (ESNext), HTML, CSS, and SSR/SSG/ISR.
- **UI & Component Libraries:** Radix UI, Ant Design, Tailwind CSS, Storybook, custom design systems, and accessible (WCAG/ARIA) component architecture.
- **State Management & Data:** Redux, Redux Toolkit, Zustand, React Query, RxJS, and REST/GraphQL API integration.
- **Performance & Optimization:** Core Web Vitals, Lighthouse, code splitting, lazy loading, CDN strategies, bundle analysis (Webpack, Rollup), and React Profiler.
- **Testing & Quality:** Playwright, Jest, Cypress, Enzyme, Allure Reports, Storybook, ESLint, Prettier, and CI-driven QA.
- **CI/CD & Infrastructure:** GitHub Actions, Docker, AWS (CloudFront, S3), Vercel, Nx monorepo orchestration, and automated deployment pipelines.
- **Data Visualization:** Recharts, react-chartjs, dynamic dashboards, and interactive chart rendering.
- **Leadership:** Technical architecture reviews, mentorship, Agile/Scrum, TDD/BDD, and cross-functional collaboration with Product, UX, and Backend teams.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, owning design, implementation, testing, and deployment end-to-end.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, **accessibility (WCAG)**, and developer velocity across multiple product teams.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma vector database, enabling users to query their data in real time via a conversational interface.
- Optimized application performance by implementing **lazy loading, code splitting**, dynamic imports, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools.
- Implemented responsive layouts, memoization to minimize re-renders, and efficient asset delivery strategies, improving responsiveness across devices and screen sizes.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Implemented **JWT-based authentication** and **role-based access control** with **TypeScript** and **React Query**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with Allure Reports on GitHub Pages and configuring Slack notifications for build quality visibility.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and code quality through regular code reviews and pair programming.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience.
- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports and more reliable releases.

- Utilized **Storybook** for documenting React components, streamlining change management and supporting agile development practices with precise user story planning.
- Established engineering standards for code quality, testing, and deployment using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code and consistent design across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, processing thousands to millions of daily financial transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Built a real-time account reconciliation solution, boosting daily transaction reconciliation by **60%** through innovative transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface across the settlement platform.
- Built dynamic **data visualization dashboards** using **React** and **react-chartjs**, streamlining management of user roles and permissions with **Redux Toolkit** and **Ant Design** UI components.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas, collaborating closely with the business team to ensure technical solutions met product needs.
- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface across the application.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments on Heroku and production servers on **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and structured task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing REST API endpoints for multiple client-facing applications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to NodeJS backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered civic tech platform for Nigerian budget analysis. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications** including 3 **Next.js** frontends (citizen-facing web app with 22 interactive chart types via **Recharts**, admin dashboard, and marketing landing page) with **SSR**, responsive mobile layouts, and dark mode support.
- Built the citizen-facing frontend with **React 19**, **Tailwind CSS**, and **Recharts**, featuring 22 interactive chart types auto-generated from AI responses, URL state management, and responsive layouts optimized for mobile and desktop.
- Implemented shareable public conversations with SEO optimization (Open Graph metadata, JSON-LD FAQPage schema, slug-based URLs with SSR), and configured **Playwright** E2E tests across 4 test projects (web auth, dashboard auth, desktop Chrome, mobile Pixel 5).

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
