Hiring Manager
Redcare Pharmacy
Berlin, Germany

Dear Hiring Manager,

Redcare Pharmacy's mission to be Europe's people-first pharmacy, putting patient care at the center of every technical decision, is exactly the kind of purpose-driven engineering I want to contribute to. With 8 years of professional experience building scalable web applications across healthcare, fintech, and e-commerce domains using Node.js, TypeScript, React, and NestJS, I am excited to apply for the Senior Fullstack Engineer (BE Focused) role on your Berlin team.

Most recently, I architected an entire platform as a NestJS and Next.js monorepo managing 6 applications, including a NestJS API backend, a document ingestion pipeline, and multiple Next.js frontends, all orchestrated with Nx and deployed via Docker Compose with health checks, memory limits, and Traefik reverse proxy routing. This project gave me deep, hands-on experience designing backend services with clean API contracts, implementing SSE streaming for real-time communication, and working with PostgreSQL and Prisma in a production distributed system. At Genentech (Roche), I co-developed a full-stack Next.js application powered by a RAG system and led a migration from Vue.js to React, optimizing performance through lazy loading, code splitting, and CDN delivery while integrating Playwright end-to-end tests into the CI/CD pipeline for release reliability.

Your tech stack is a strong match for my skill set. I have built production NestJS services with TypeScript, designed RESTful APIs, worked with MongoDB, implemented event-driven patterns with SSE and real-time streaming, and deployed containerized applications with Docker and CI/CD pipelines via GitHub Actions. At ActivEdge Technologies, I built a high-volume bank settlement solution processing thousands to millions of daily transactions using React, Redux, and RxJS for real-time data streaming, giving me direct experience with the kind of high-throughput, event-driven systems that power an e-commerce platform at scale. I also bring a strong mentorship track record, having guided junior engineers and interns across three different roles.

I would welcome the opportunity to discuss how my backend-focused fullstack experience can contribute to Redcare Pharmacy's web-shop platform and engineering culture. Thank you for your time and consideration.

Sincerely,

Ogbonna Arinze
