Hiring Team
Aerion (formerly CoffeeCup)
Munich, Germany

Dear Hiring Team,

Aerion's focus on eliminating the manual busywork between CRMs, ticketing systems, and billing tools for consulting teams is exactly the kind of high-leverage B2B problem I love solving. A small team building workflow automation for an underserved market, with TypeScript end-to-end and AWS Lambda at the core, is where I do my best work. I'm excited to apply for the Senior Full Stack Engineer role.

I bring 8 years of professional experience building full stack web applications with TypeScript, React, and Node.js. Most recently at Genentech (Roche), I co-developed a full-stack Next.js application with TypeScript from API layer to UI, implemented JWT-based authentication with role-based access control, and integrated Playwright end-to-end tests into the CI/CD pipeline. In parallel, I've been architecting OurNigeria, a TypeScript-first platform built as an Nx monorepo managing 6 applications: NestJS API backends deployed with Docker Compose, a PostgreSQL database designed with Prisma, Next.js frontends, and CI/CD pipelines powered by GitHub Actions. Designing the relational database schema, building REST APIs, and owning the full deployment infrastructure has deepened my comfort working across every layer of the stack.

Earlier in my career, I built Node.js RESTful APIs and database schemas at both Founders Lair and SureTrade Business Solutions, giving me well over 4 years of hands-on Node.js experience. At ActivEdge Technologies, I worked in a team of 3 to build a bank Settlement Solution handling millions of daily transactions, boosting settlement rates by 80%. Across every role, I've been the engineer who participates actively in code reviews, pairs with teammates to unblock problems, and mentors junior developers. Aerion's feedback-driven, pair-programming culture is how I naturally prefer to work.

I'd welcome the chance to discuss how my full stack TypeScript experience, Node.js depth, and track record of shipping features end-to-end can help Aerion deliver more value to consulting teams. Thank you for your time and consideration.

Sincerely,

Ogbonna Arinze
