SUMMARY

Senior Frontend Developer with 8 years of professional experience building high-performance, developer-facing web applications and reusable component systems across React, Next.js, Vue.js, and TypeScript. Deep expertise in JavaScript fundamentals, framework migration, and architecting scalable frontend solutions, including design systems, SDK-like component libraries, and cross-framework tooling. Proven track record of optimizing bundle sizes, load times, and runtime performance through code splitting, lazy loading, and advanced profiling. Passionate about developer experience, framework-agnostic architecture, and shipping high-quality software in fast-paced startup and enterprise environments.

CORE COMPETENCIES

- **JavaScript & TypeScript:** Deep ESNext proficiency, Vanilla JavaScript optimization, framework-agnostic patterns, and cross-browser API usage (EventSource, JWT, Web APIs).
- **Frontend Frameworks:** React, Next.js (SSR, App Router), Vue.js, with production experience migrating between frameworks and building reusable component libraries.
- **Architecture & Tooling:** JAMSTACK, SSR/SSG, design systems (Radix UI), monorepos (Nx, Turborepo), Webpack/Vite/Rollup bundler optimization, and Storybook.
- **Performance Optimization:** Code splitting, lazy loading, CDN strategies, bundle analysis (webpack-bundle-analyzer, rollup-plugin-visualizer), Lighthouse, and Core Web Vitals.
- **Testing & Quality:** Playwright, Jest, Cypress, Allure Reports, ESLint, Prettier, Husky, and CI-driven quality gates.
- **Cloud & Deployment:** Vercel, AWS (CloudFront, S3), Docker, GitHub Actions, CI/CD pipelines, and automated deployment workflows.
- **Leadership:** Technical direction, architecture reviews, mentorship, Agile/Scrum, and product-minded development in startup and enterprise settings.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)

Frontend Engineer — *May 2023 - Present*

- Spearheaded a full **framework migration** of the main clinical trial data product from a **Vue.js** web application to a **React** Chrome extension, demonstrating deep proficiency in both frameworks and the ability to architect cross-platform frontend solutions.
- Maintained and extended the existing **Vue.js** codebase during the migration period, shipping features and fixing bugs in parallel with the React rebuild, ensuring continuity across both framework ecosystems.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams, serving as a shared component library.
- Optimized application performance by implementing **lazy loading, code splitting**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools. Used memoization to minimize re-renders and responsive layouts for cross-device compatibility.
- Implemented **JWT-based authentication** and **role-based access control** using **TypeScript** and **React Query**, with HTTP-only cookies for secure token handling and permission-based UI rendering.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using **OpenAI GPT models**, **LangChain**, **Vercel AI SDK**, and **Chroma** vector database, showcasing SSR capabilities and modern Next.js architecture.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and code quality.

Descasio — Lagos, Nigeria (Hybrid)

Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through **rollup-plugin-visualizer** and **webpack-bundle-analyzer**, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, improving speed and user experience.

- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports and more reliable release cycles.
- Utilized **Storybook** for documenting React components, streamlining change management and ensuring clear communication of component APIs and usage patterns across the team.
- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for reactive data streaming, and **Axios** for asynchronous API requests.
- Adopted the native browser **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface, demonstrating strong **Vanilla JavaScript** and Web API proficiency.
- Built dynamic data visualization dashboards using **React** and **react-chartjs** with **Redux Toolkit** and **Ant Design** UI components.
- Developed a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas.
- Transformed Figma designs into reusable **React** components and engineered a **CI/CD pipeline** for automated deployment to **Heroku** and **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications**: NestJS API backend, **Next.js** citizen-facing web app with **React 19** and **Tailwind CSS v4** (22 interactive chart types), Next.js admin dashboard, NestJS document ingestion pipeline, Next.js marketing landing page, and a Remotion video generation service.
- Built the Next.js citizen-facing frontend with **SSR** for shareable public conversations, **SEO optimization** (Open Graph metadata, JSON-LD schema, slug-based URLs), dark mode, URL state management with nuqs, and responsive mobile layouts.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** end-to-end tests across 4 projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
