SUMMARY

Web Developer with 8 years of professional experience building secure, enterprise-grade web applications using React, TypeScript, and modern frontend tooling. Proven expertise in modular, component-based architecture, monorepo workspace setups, and scalable state management with React Query, Zustand, and Redux. Experienced in building reusable design systems with component libraries, optimizing build pipelines with Vite and Webpack, and driving code quality through automated testing, CI/CD pipelines, and rigorous code reviews. Strong collaborator with a track record of mentoring developers, participating in software design discussions, and delivering high-performance applications across healthcare, fintech, and enterprise B2B environments.

CORE COMPETENCIES

- **Frontend Development:** React, TypeScript, HTML5, CSS3, modular component-based architecture, responsive layouts, and accessibility (WCAG/ARIA).
- **State Management & Data Fetching:** React Query, Zustand, Redux/Redux Toolkit, RxJS, and Axios.
- **Build Tools & Bundlers:** Vite, Webpack, Rollup, Nx monorepo orchestration, and npm/pnpm workspaces.
- **UI Component Libraries:** Radix UI, Ant Design, Storybook, Tailwind CSS, and custom design systems.
- **Testing & Quality:** Playwright, Jest, Cypress, Allure Reports, ESLint, Prettier, Husky, and Lint-staged.
- **CI/CD & Infrastructure:** GitLab CI/CD, GitHub Actions, Docker, AWS, Git version control, and automated deployment pipelines.
- **Backend & APIs:** Node.js, NestJS, REST APIs, Next.js, PostgreSQL, MongoDB, JWT authentication, and RBAC.
- **Performance & Observability:** Core Web Vitals, code splitting, lazy loading, Lighthouse, Chrome DevTools, React Profiler, and bundle analysis.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension, building modular, component-based architecture for clinical site integrations.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Introduced **Redux** for state management and **React Query** for server-state caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Optimized application performance by implementing **lazy loading, code splitting**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and **Chrome DevTools**.
- Implemented **JWT-based authentication** and **role-based access control** on the frontend using **TypeScript** and **React Query**, with HTTP-only cookies for secure token handling and permission-based UI rendering.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, publishing test results on GitHub Pages via **Allure Reports** and configuring Slack notifications for build quality visibility.
- Maintained and extended the existing **Vue.js** codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and code quality through code reviews and pair programming.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface with **TypeScript**, achieving a **25% boost in user engagement** and collaborating with architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Managed state with **Zustand** and **Redux**, driving a **40% improvement** in application performance by optimizing caching mechanisms across the React application.
- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports and improved release confidence.
- Utilized **Storybook** for documenting React components, streamlining change management and supporting agile development practices including user story planning and estimation.

- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes across the team.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code and consistent design across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, processing thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface.
- Built dynamic data visualization dashboards using **React** and **react-chartjs**, streamlining management of user roles and permissions with **Redux Toolkit** and **Ant Design** UI.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **Node.js** RESTful APIs and translated business requirements into efficient **MongoDB** database models and schemas, focusing on testable, maintainable, and well-documented code.
- Transformed Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface across the application.
- Engineered a **CI/CD pipeline** using **GitLab** for automated deployment of APIs to testing environments on Heroku and production servers on **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and code review feedback.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **Node.js**, building and testing REST API endpoints for multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **Node.js** backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered civic tech platform for Nigerian budget analysis. 700+ documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications** with **pnpm workspaces**: NestJS API backend, Next.js citizen-facing web app, Next.js admin dashboard, NestJS document ingestion pipeline, Next.js marketing landing page, and a Remotion video generation service.
- Built the **Next.js** citizen-facing frontend with **React 19**, **Tailwind CSS v4**, and **Recharts**, featuring 22 interactive chart types auto-generated from AI responses, dark mode, URL state management, and responsive mobile layouts.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** E2E tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
