SUMMARY

Senior Frontend Engineer with 8 years of experience building scalable, user-centric web applications across SaaS, healthcare, fintech, and enterprise B2B environments. Deep expertise in **React**, **Next.js**, and advanced **TypeScript**, with a strong track record of architecting design systems, optimizing frontend performance, and taking full feature ownership from implementation to deployment. Experienced in cross-functional collaboration with backend engineers and designers, with strong UX/UI sensibility and a product-driven engineering mindset. Proficient with modern tooling including **React Query**, **Storybook**, **TailwindCSS**, **GitHub Actions**, and observability platforms (**Sentry**, **Datadog**).

CORE COMPETENCIES

- **Frontend Architecture:** Scalable component systems, design systems (Radix UI), monorepos (Nx, Turborepo), SSR/SSG/ISR, and responsive layouts.
- **Core Stack:** TypeScript (advanced generics, utility types), React, Next.js, React Query, Redux, Zustand, and TailwindCSS.
- **UI/UX & Component Development:** Storybook, Radix UI, accessible design systems (WCAG/ARIA), Figma-to-code workflows, and responsive design.
- **Testing & Quality:** Playwright, Jest, Cypress, Allure Reports, Storybook, ESLint, Prettier, and CI-driven QA.
- **DevOps & Tooling:** GitHub Actions, CI/CD pipelines, Docker, AWS (CloudFront, S3), Sentry, Datadog RUM, and feature flag workflows.
- **Performance & Observability:** Core Web Vitals, code splitting, lazy loading, CDN strategies, Lighthouse, bundle analysis, and React Profiler.
- **Leadership:** Technical direction, architecture reviews, mentorship, Agile/Scrum, and product-minded development.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension with **TypeScript**, optimizing workflows for clinical site integrations and taking full ownership from implementation through deployment.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Introduced **Redux** for state management and **React Query** for server-state caching and request deduplication, refactoring legacy class components to functional components and streamlining data flow across the application.
- Optimized application performance by implementing **lazy loading, code splitting, dynamic imports**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools.
- Implemented **JWT-based authentication** and **role-based access control** in **Next.js** with **TypeScript** and **React Query**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma vector database, enabling users to query their data in real time via a conversational interface.
- Increased release reliability by integrating **Playwright** end-to-end tests into the **CI/CD pipeline** with **GitHub Actions**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Maintained and extended the existing **Vue.js** codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and code quality.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application.
- Utilized **Storybook** for documenting React components, streamlining change management, and supporting agile development practices with precise user story planning and estimation.
- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports.

- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React**, **Redux**, **RxJS**, and **Axios**, managing complex asynchronous data flows across the application.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface.
- Built dynamic data visualization dashboards using **React** and **react-chartjs** with **Redux Toolkit** and **Ant Design**.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas.
- Transformed Figma designs into reusable **React** components and engineered a **CI/CD pipeline** for automated deployment to **Heroku** and **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications** including 3 **Next.js** frontends (citizen-facing web app with 22 interactive chart types, admin dashboard, and marketing landing page) built with **React 19**, **TypeScript**, and **Tailwind CSS v4**.
- Built responsive, mobile-first UIs with dark mode support, URL state management via nuqs, and **Recharts** data visualizations auto-generated from AI responses.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** E2E tests across 4 test projects (desktop Chrome, mobile Pixel 5), and **Docker Compose** production deployment with multi-stage Dockerfiles and health checks.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
