SUMMARY

Frontend engineer with 8+ years of professional experience building high-performance, component-driven UIs in React and TypeScript for regulated industries, fintech-scale transaction systems, and data-heavy products. Proven track record of measurable UI performance wins, design systems, robust state management, and automated testing inside CI/CD pipelines. Relocating within Berlin, motivated by industrial and IoT interfaces where reliability, performance, and clarity matter on the plant floor and in the browser.

CORE COMPETENCIES

- **Languages:** TypeScript, JavaScript (ESNext)
- **UI & Styling:** React, component libraries, Radix UI, Ant Design, Tailwind CSS, responsive UI, accessibility
- **State & data:** Redux, React Query, Zustand, RxJS, REST integration
- **Quality & perf:** Lighthouse, Chrome DevTools, React Profiler, bundle analysis, E2E (Playwright), unit tests (Jest)
- **Tooling & delivery:** GitHub Actions, CI/CD, Storybook, Docker Compose
- **Real-time UIs:** EventSource, SSE-oriented patterns, streaming data to the client

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Redesigned the core product for connecting and transferring clinical trial site data to upstream EHR systems, migrating from a **Vue.js** app to a **Chrome extension in React** while maintaining the legacy stack until cutover.
- Improved load and runtime performance with **lazy loading, code splitting, image optimization, memoization**, CDN-backed assets, and audits in **Lighthouse** and Chrome DevTools, raising responsiveness on real devices.
- Delivered secure **JWT-based auth on the client** with HTTP-only cookies, role-based UI, and close coordination with backend teams on token refresh and permissioning.
- Standardized on **Redux** and **React Query**, refactoring class components to modern React and tightening request caching and developer experience.
- Ran **Playwright E2E suites** in GitHub Actions with Allure reports published to GitHub Pages and Slack links on each push, increasing stakeholder trust in releases.
- Co-built a full-stack Next.js RAG chat widget (OpenAI, LangChain, Vercel AI SDK, Chroma) so users could embed a conversational experience on third-party properties.
- Led a **React and Radix UI design system** that improved UI consistency, accessibility, and team velocity; mentored two junior developers (interns).

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Shipped a **React and TypeScript UI** that contributed to a **25% increase in user engagement**, working with architects on scalable client architecture and faster integration with backend services.
- Cut bug reports by about **20%** by introducing **Jest** and **Enzyme** with disciplined coverage on critical paths.
- Used **Storybook** to document components, align stakeholders, and support agile planning of stories and estimates.
- Improved React app performance by roughly **40%** through stronger caching, profiling, and targeted fixes.
- Reduced bundle size by **30-40%** (rollup-plugin-visualizer, webpack-bundle-analyzer) and sped up load by about **35%** after **React Profiler** and Lighthouse-driven fixes.
- Rolled out ESLint, Prettier, Husky, lint-staged, and **GitHub Actions** to raise code quality and speed up CI/CD across the team.
- Mentored junior engineers on frontend standards and review practices.

ActivEdge Technologies Lagos, Nigeria

Senior React Developer *Oct 2019 - Sep 2021*

- Built high-volume bank settlement UIs in a team of three frontend engineers, supporting thousands to millions of daily transactions and roughly an **80% boost** in settlement rates.
- Implemented MasterCard, VISA, Express-cash, and e-commerce modules with **React, Redux, RxJS, and Axios**.
- Improved same-day reconciliation by about **60%** with a real-time reconciliation experience grounded in strong data handling on the client.
- Replaced socket-style patterns with the native **EventSource API** for leaner, faster streaming updates in the browser.
- Built React and react-chartjs dashboards with **Ant Design, Redux Toolkit**, and role-based access for operations users.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Turned Figma and product requirements into reusable **React components** with a consistent, intuitive UI.
- Built **Node.js REST APIs** with clear structure and test hooks for new product features.
- Owned a GitLab-based **CI/CD** path that deployed APIs to Heroku for testing and to AWS for production.
- Coached two interns across frontend and backend workstreams.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Delivered features for SureEdu, a school management portal, in a team of five, covering staff, students, and guardians (attendance, payroll, exams, reports).
- Implemented MongoDB-backed models and shared **Node.js** application logic between server and client areas of the product.
- Authored API and product documentation, and tested triggers, UDFs, and endpoints before release.
- Shared ownership of integration between the frontend and backend layers for multiple internal apps.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for budget analysis and transparency.

- Owns the citizen-facing **Next.js** app in an **Nx monorepo**, using React 19, Tailwind CSS, and Recharts with many interactive visualizations, plus responsive layouts and production auth flows.
- Delivers real-time chat with **SSE streaming**, keepalives, and token-budgeted context for stable proxy behavior in production.
- Runs **Docker Compose** based deployment with health checks, **Playwright** in **GitHub Actions**, and strict resource limits for API and data services.
- Applies strong SEO and shareable public pages with server rendering where it matters for discoverability.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
